LISTENING

01

SECTION 1

Questions 1-10

Questions 1-5

Complete the details in the form below.

Write NO MORE THAN ONE WORD AND/OR A NUMBER for each answer.

Z-Mobile Services Incident Report_Sheet	
Example Postcode	Answer CN21EB
Mobile phone number	078901.....570
Name	2.....Green
Crime Reference Number	CZ – 3-5
4..... Mobile	Not Known
Equipment	
Identity (IMEI) number	1-2pm, 16 5.....
Time, date of theft

Questions 6–10

Choose the correct letter, A, B or C.

- 6 The caller's phone was stolen
- A when he went to the toilet.
 - B from the table.
 - C from his pocket.
- 7 The caller will have to pay a charge
- A for a new phone.
 - B if his phone is stolen again.
 - C in 12 months' time.
- 8 The delivery address is
- A 34 Solent Gardens.
 - B 34 Solent House.
 - C 34 Solent Grove.
- 9 The caller's IMEI number
- A can be found on the side of the phone battery.
 - B is made up of 15 digits.
 - C cannot be found,
- 10 The operator
- A transfers the caller to a colleague.
 - B will ring the caller back the next day.
 - C asks the caller to ring back.

SECTION 2

Questions 11-20

Questions 11-13

Choose *THREE* letters, A-G.

Which *THREE* things did the presenter say he enjoyed about his holiday?

- A the food
- B the weather
- C the nightlife
- D the journey
- E the people he met
- F His children had a good time.

Questions 14-16

Write *NO MORE THAN THREE WORDS* for each answer.

Which *THREE* radio shows does the presenter recommend Sally listen to?

14

15

Questions 17–18

Choose the correct letter, A, B or C.

14 What does John object to?

- A the time of day the programmes are on
- B the lack of time guests have to answer questions
- C the interviewers' questions

15 How does John think the problem could be solved?

- A have further live radio shows
- B put the radio shows on at different times
- C extend the show on the Internet

Questions 19–20

Choose TWO letters, A–E.

Which TWO things does Clive want to hear more of on the radio station?

- A younger guests
- B music for older people
- C consumer issues for older people
- D older presenters
- E health problems faced by older people

SECTION 3

Questions 21-30

03

Questions 21-25

Complete the notes below.

Write NO MORE THAN THREE WORDS for each answer.

PRESENTATION INFORMATION

Day	21.....
Subject	22.....
Length	23.....
Technical equipment needed	24.....
Location	25.....

Questions 26-30

Which person is responsible for the following tasks?

Write the correct letter. A, B or C, next to questions 26-30.

NB You may use any letter more than once.

A Simon

B Kelly

C Fiona

26 introduce and end the talk

27 talk about the historical perspective

28 talk about the contemporary situation

29 book the technical equipment

30 build the presentation

Test 1; Listening

- 33 The speaker thinks it's important that
- A the academic planner is kept safe somewhere.
 - B the academic planner is put somewhere it can be seen easily.
 - c students remember to collect their academic planner.
- 34 When filling in the academic planner students should
- A ignore non-academic occasions,
 - B try to keep visits home to a minimum.
 - c add all important academic and non-academic dates.
- 35 Initially, the academic planner will
- A give the wrong impression about the amount of work there is.
 - B show some days are busier than others.
 - c give a clear idea of busy periods.
- 36 According to the tutor, students should organise their studies
- A so that they have time for coffee breaks.
 - B so that they don't miss any seminars or lectures.
 - c as if it were a normal working day.
- 37 The tutor makes the point that
- A cookery students do well when writing essays.
 - B cooking and essay writing share certain characteristics.
 - c cooking is a complicated process.

Questions 38–40

Choose *THREE* letters, A–G.

Which *THREE* things does the tutor recommend?

- A When planning self-study, note the time you should spend studying.
- B Break tasks down into individual stages.
- C Avoid working in the evenings.
- D Put time aside for favourite TV programmes.
- E Do household tasks at regular times.
- F Avoid the Library if your friends are there.

READING

READING PASSAGE 1

You should spend about 20 minutes on Questions 1-12, which are based on Reading Passage 1 below.

Invasive species

Britain's rivers and estuaries are being invaded at an alarming rate by a small furry-clawed crab all the way from China. So how did a crab travel so far and why are naturalists

so concerned? The mitten crab first arrived in Europe on ships sailing from Asia. It then spread rapidly from Portugal to Sweden and was first reported to be in the River Thames in 1935. From the Thames, it spread across the United Kingdom at a very rapid rate: by 1999 mitten crabs had spread across 448 km of British coastline, sometimes walking miles overland to reach the next river. A team from (he University of Newcastle found that UK rivers are being invaded three times faster today than in 1935. And there's little wonder - a single female crab can carry between 250,000 and 1,000,000 eggs so mitten crab colonies expand very rapidly. Furthermore, cleaning up pollution from Britain's rivers is simply helping the invaders.

The mitten crab is one example

of many invasive species that have found their way from their original habitat into foreign lands. There are several ways invasive species move from country

to country: they may expand their territory naturally as their colony grows; but far more frequently an invasion is associated with human activity. The main causes include shipping, deliberate introduction for hunting or work, and the escape of pets into the wild. The introduction of the mitten crab to Europe was probably accidental: ships taking on water to use as ballast to keep the vessel steady on its journey from Asia to Europe also took on the unwanted guests and carried them to new areas to colonise. Elsewhere, invasive species have been purposefully introduced by man. In 1859, 24 rabbits were introduced into Australia by Thomas Austin so that he could hunt them for recreation. Unfortunately, like the mitten crab, rabbits are prolific breeders: a single

Chạm để tiếp cận kho tài liệu IELTS miễn phí

pair of rabbits are able to increase to 184 individual rabbits in just one and a half years and they spread at a rate of 130 km per year. Soon the population in Australia was out of control and had spread throughout the continent. Another domestic creature introduced from India into Australia in the 1800s was the dromedary camel. Camels were initially brought to work as pack animals to carry heavy loads across the hot desert interior of Australia. By 1920 it was estimated that around 20,000 camels were being used to transport goods. However, with the arrival of trains and cars, camels were released into the wild where their numbers had increased to around one million by 2008. Finally, the trade in animals as pets can enable a species to colonise areas far away from their native land.

Between 2000 and 2006 the U.S. Fish and Wildlife Service recorded 1.5 billion animal shipments made into America. 92% of these imported animals were then sold as pets, with the rest imported for research, education and zoos. While most of these animals were fish, the imports also included reptiles and mammals. When these pets escape and begin to breed, it can create serious problems. An example of this is in Florida, where in the 1990s a number of pet Burmese pythons - a snake native to south east Asia - escaped their outdoor enclosures when a major hurricane hit the state. Today, it is estimated that up 30,000 snakes inhabit the

wetlands of the Florida Everglades. Burmese pythons, which can grow up to 20 feet long, are thriving on their new diet of native species, including endangered creatures, and are more than capable of competing with the American alligator for food.

The impact of invasive species is not to be underestimated. Katherine Smith, a conservation biologist at Brown University in Providence, Rhode Island states that 'A huge amount of money goes into the myriad effects that invasive species have.' Smith continues, 'They destroy infrastructure. They cause public health threats. They harm livestock and native animals. They disrupt ecosystems. The dollar values really do increase quickly.'

When a non-native species finds its way into a new' and vulnerable environment the damage can be more or less serious as the invader out-competes the local wildlife, brings in new disease or destroys the environment. The Australian dromedary camel, forming the largest herd of wild camels in the world, competes for food with native species and may have aided the local extinction of preferred species such as the quandong tree. The Australian government estimate that the camel is responsible for AUS\$10 million in damage to infrastructure and competition for livestock food every year. Even more damaging is the effect rabbits are having in Australia. Apart from the economic loss to the wool industry, estimated at AUS\$95

million annually, rabbits compete with sheep for food. The animals have a devastating environmental impact. Close grazing of grass leads to soil erosion and has significantly altered the composition of extensive areas of land. While the real impact of the mitten crab in the UK is not known at present, scientists have noted that the crab is causing riverbank erosion as it burrows into the mud, forming a network of tunnels that make the riverbanks unstable.

Invasive species are very difficult to

manage once they have become established. Various methods have been tried to keep the populations under control. In Australia, 85,000 were culled and various methods have been tried to keep rabbit populations under control including poison and destruction of their warrens or homes. The latest idea in the UK to control the mitten crab is even simpler: catch them and give them to restaurants to sell as a tasty meal.

Questions 1-3

Do the following statements agree with the information given in Reading Passage 1 ? Write

TRUE	<i>if the statement agrees with the information</i>
FALSE	<i>if the statement contradicts the information</i>
NOT GIVEN	<i>if there is no information on this</i>

- 1 Mitten crabs originated in Vietnam.
- 2 Crabs need water to spread.
- 3 Making rivers Less dirty has aided the invasion of the mitten crab.

Questions 4-7

Look at the following items (Questions 4-7) and the list of reasons.

Match each item with the reason for their introduction.

Write the correct letter. A-E, next to Questions 4-7.

NB There are three more reasons than you will need.

Animal	Reason
4 mitten crab	A was introduced as a predator species to protect plants from pests
5 rabbit	B escaped while being used as a pet
6 dromedary camel	C escaped from laboratories conducting experiments on animals
7 Burmese python	D introduced by someone who enjoyed shooting
	E came with water used to balance ships at sea
	F were carried over by trains
	G used to carry large loads across inhospitable areas

Questions 8-11

Complete the summary below.

Choose NO MORE THAN TWO WORDS from the passage for each answer.

Write your answers in spaces 36-40.

The effects of the introduction of non-native species can bring them into 8.....with native animals. Dromedary camels may have helped the 9.....a native plant. Rabbits have led to the degradation of 10..... across large areas of Australia. At the moment, the impact of the mitten crab is 11.....

Question 12

Which of the following statements reflects the claims of the writer in the reading passage?

Choose the correct letter. A, B or C.

The writer of the article views invasive species as

- A a natural development.
- B a hard problem to manage.
- C a good business opportunity.

Test 1: Reading

READING PASSAGE 2

You should spend about 20 minutes on Questions 13-29, which are based on Reading Passage 2 below.

- A. It's a remarkable achievement: the question is no longer 'How can we send humans into space?' but 'How can we keep them there?' spaceflight is reaching a turning point where new technologies in engine development, better understanding of aerodynamics and materials for body construction are making spaceflight possible for private industry.
- B. The history of space exploration, until relatively recently, has been one of big government- backed projects like the space Shuttle, Mars Landers and Long March rockets. But the most recent launches to the International space station (ISS) have been very special for at least three reasons. Firstly, along with 450 kg of scientific equipment, food and clothes, the rocket was carrying ice cream for the three space station astronauts. Secondly, the rocket was

unmanned, being guided into docking position and back to earth again by remote control and automated systems. Finally, the rocket was commissioned from a private company by NASA.

- C. When the privately owned rocket delivered its goods to the ISS, it marked a milestone in the evolution of space flight and vindicated NASA's decision to delegate routine supply flights to the space station. The flight has been a long time in development. It started with President George w Bush announcing his Vision for Space Exploration, calling for the ISS to be completed. Under the next President, America's Space Shuttles were retired leaving NASA with no other choice but to look for alternative methods of supplying the ISS. The initiative was part of an effort to commercialise the space industry in order to decrease costs and spread the investment in the industry across a wider group than governments.
- D. The initiative had many attractions for NASA. By outsourcing to the private sector the routine business of taking food and equipment to and from low-earth orbit, NASA can theoretically free up money to do things that it really wants to prioritise: missions such as sending astronauts to Mars and landing on asteroids by the 2030s. Now that the Space Exploration Technologies Corporation (SpaceX) has proved that private enterprise can be players in space exploration, firms are pouring money into developing new spacecraft built to transport cargo, to mine asteroids and to carry passengers into space.
- E. In the last half of the twentieth century only government-backed agencies like NASA and Russia's ROSCOSMOS were capable of running space programmes due to the gigantic investment costs and uncertain payoffs. However, SpaceX and similar companies are proving that the former conditions are no longer relevant as new solutions are coming to light. Commercial companies like Boeing are able to raise large sums of money to run these projects. Furthermore, as the firms are running cargo and taxi services to lower orbits, the break-even point is lower, the technology is cheaper and they have the benefit of years of experience in commercial aviation and space flight. Opening space programmes to the commercial sector has the additional advantage of generating more solutions to old problems. An analogy is the invention of the Internet: when the technology went into the commercial sector, no one could have envisioned the development of social network sites. Likewise, no one can predict where commercial enterprise will take the space industry.
- F. The uncertainty surrounding where the space industry will end up is a problem as well as an asset and it is unsettling private investors who like to invest in relatively certain prospects. At the moment the industry is dominated by big-spending billionaires like the owner of SpaceX. In addition, the relatively small number of companies in the area could pose a problem in

Chạm để tiếp cận kho tài liệu IELTS miễn phí

the future. The commercial space industry is still very new and there is no guarantee that progress will be smoother. For one thing, no one is sure that the business model is sound: government is still the major, if not only, customer available to the private space companies. The other problem is that space travel is high risk: the loss of space shuttles Challenger in 1986 and Columbia in 2003 illustrates that even the most carefully planned launches have unavoidable risks associated with them. The question is what would happen to the industry if another accident occurred. Finally, many space experts are doubtful that, even if private industry takes over the 'taxi' role for low-orbit missions, NASA will be able to achieve its ambitions, given its squeezed budgets and history of being used for political purposes. Furthermore, NASA may have created another space race, this time between government and private industry. If NASA doesn't go to Mars or the asteroid belt, its private competitors certainly have plans to do so.

- G. In spite of all of these risks, many argue that it is critical for the private sector and federal government to work together to push further into space.

Test 1: Reading

Questions 13-18

Reading Passage 2 has seven paragraphs, A-G.

Which paragraphs, A-F, contain the following information?

Write *the correct letter, A-F, next to Questions 13-18.*

- 13 NASA being able to spend money on important projects
- 14 events leading to the commercialisation of spaceflight
- 15 new developments that have made spaceflight more accessible
- 16 an automated rocket that successfully completed a mission
- 17 the great dangers of space travel
- 18 new answers being found to previous questions

Test 1: Reading

Questions 19-25

Choose *the correct letter, A, B, c or D.*

- 19 Which is NOT mentioned as making private space flight possible?
 - A new methods of constructing the rockets
 - B modern substances from which to build the rockets
 - C understanding better how air moves round objects
 - D new methods of making space suits
- 20 Why are the recent launches special?
 - A Their destination was the International Space Station.
 - B They carried clothes.
 - C They were not managed by a private company.
 - D The rocket is not owned by a government.
- 21 In order to make NASA Look for other spaceflight providers, the US government
 - A invested in private space companies.
 - B started to build the international space station.
 - C stopped using the Space Shuttle.

D allowed private companies to fly into space.

22 Private companies

A need to reduce the cost of space projects.

B have social network sites.

C are able to fly rockets at high orbits.

D act as ferries to and from the space station.

23 At present, the private space industry is characterised by

A uncertainty about how to make profits.

B companies controlled by individuals.

C companies too small to raise the amount of money needed.

D government interference.

Test 1: Reading

Questions 24-29

Complete the summary below.

Choose NO MORE THAN TWO WORDS from the passage for each answer.

Write your answers in spaces 26-29.

There are a number of problems with commercial space projects. To start with, the 24..... might not be sound. There is also great 25..... attached to space flight - what would happen if there was another 26.....? Experts doubt whether NASA can fulfill its 27..... as it has often been under 28..... pressure. Moreover, the development may lead to a 29..... between NASA and the private space industry.

READING PASSAGE 3

You should spend about 20 minutes on Questions 30-40, which are based on Reading Passage 3 on the following pages.

Questions 30-34

Reading Passage 3 has six paragraphs, A-F,

Choose the correct heading for paragraphs B-F from the list below.

Write the correct number, i-ix, next to Questions 30-34.

List of Headings

- I. Shielding the earth from the atmosphere
- II. Bouncing back the sun's rays from earth
- III. The effect of volcanoes on the atmosphere
- IV. Criticisms of geoengineering
- V. Trapping greenhouse gases
- VI. The root of the problem
- VII. Why attempt geoengineering?
- VIII. Protecting glaciers
- IX. The need for action

<i>Example</i>	<i>Answer ></i>
Paragraph A	ix

- | | |
|---------------|---|
| 30 Paragraphs | B |
| 31 Paragraph | C |
| 32 Paragraph | D |
| 33 Paragraph | E |
| 34 Paragraph | F |

Test 1: Reading

Engineering a solution to climate change

- A. Looking at the rate of climate change and the disastrous effects it is having on the world, scientists are concerned that we are acting too slowly. Many are now looking to geoengineering - large-scale human interventions to change the world's climate - to counteract global warming. The schemes range from the mundane to science fiction but all come from the same impulse: if we don't do something now, it may be too late to do anything.
- B. Climate change is now so rapid that, in the very near future, the Arctic will be ice-free during winter as less ice forms during winters and more melts in summer. Scientists say that tackling climate change isn't a problem we need to deal with in 10 or 20 years' time; we need to look at radical solutions now. A study has shown that the technologies to produce these geoengineering projects already exists and could be in place for around \$5 billion a year. This is a bargain when compared with the cost of reducing carbon dioxide emissions, a major greenhouse gas: that figure stands at somewhere between \$200 and \$2,000 billion.
- C. So what exactly are scientists planning to do to deal with global warming in the short term? Among the main schemes are shielding the earth from the sun's rays either at ground or atmospheric level, or capturing the carbon produced by industry and sinking it back into the ground or the sea. Shielding the world has produced ideas that range from simple science to science fiction. One suggestion has been to make the roofs of buildings and roads whiter to reflect the sun's rays back into space. While this has the advantage of simplicity, it simply won't make much difference, reflecting only 0.15 watts per square metre, averaged across the planet. To put this into perspective, to stop earth warming we need to increase heat loss by about 3.7 watts per square metre averaged over the world. Another idea is to protect the Greenland ice field by covering it in giant sheets of reflective material. If this works, it could help in the Antarctic where the giant Filchner-Ronne ice shelf is melting rapidly. If this glacier disappears completely, it would raise sea levels, causing catastrophic flood damage around the planet.
- D. If reflecting heat back from the ground has little effect, there are two alternatives: seeding clouds and replicating volcanic activity. The first idea is to make clouds whiter by increasing the amount of rain in them. Sending salt particles into clouds should 'seed' the clouds with more raindrops. Clouds carrying more raindrops would be whiter and better reflectors of sunlight. This could be good news for the earth and in addition could be stopped when necessary with the salt completely clear from the skies within ten years. Unfortunately, other research indicates that creating whiter clouds may have

unwanted side effects, producing adverse weather conditions in the region and changing ocean currents. A much older idea is to replicate the effect volcanoes have had on the atmosphere. A volcanic eruption sends large amounts of ash and sulphur into the air, which block the sun and create cooler conditions. For example, when Mount Pinatubo erupted in 1991, it produced a sulphur dioxide cloud, which reduced average global temperatures by one degree centigrade. Geoengineers have long put forward the idea of circulating particles of sulphur in the atmosphere to counteract global warming. The particles would be delivered by aircraft or balloons spraying them into the atmosphere. However, this also has unpredictable effects on the amount and pattern of rainfall. Furthermore, this method would delay the recovery of the ozone layer over the Antarctic by 30 to 70 years. More ambitious geoengineering projects have included placing billions of reflective balloons between the sun and the earth and putting giant mirrors into orbit. Scientists have criticised these approaches as 'science fiction' and say they are unlikely to happen due to the huge costs involved.

- E. Whatever actions we take to block or reflect the heat from the sun, we will still need to reduce the amount of carbon dioxide in the atmosphere. Various geoengineering projects have been proposed to do this. Carbon capture technologies range from planting trees, which naturally use carbon dioxide as they grow, to pumping carbon back into the earth and trapping it there. This is a good idea but would only account for about 0.5 watts per square metre. Carbon capture technologies are already in use at power stations where the greenhouse gas is taken at point of production and pumped underground into depleted gas and oil reserves. However, the technology to do this is not very efficient, other ideas for taking carbon out of the atmosphere include seeding the oceans with iron. This would increase the growth of plankton which, like trees, use carbon naturally. Unfortunately, this would only account for 0.2 watts per square metre.
- F. Proponents of geoengineering have never regarded the earth-changing engineering projects as a complete solution. Nevertheless, the concept as a whole attracts many criticisms. One is that the problem of climate change is of such huge scale and complexity that there will not be one single solution. All proposals so far have advantages and disadvantages. The biggest problem of all is that many of the projects are untested and any of the proposals may have unforeseen consequences. For example, we could not suddenly stop a geoengineering scheme; keeping temperatures artificially low for a period then taking away the cause of this would cause the temperature to rise again rapidly. Furthermore, global engineering solutions to the problem of climate change would need the agreement of all the world's leaders: having an American solution, a Chinese solution, a Brazilian solution, and so on simply wouldn't be politically acceptable. But the biggest downfall is that geoengineering projects could reduce the political and popular pressure for reducing carbon emissions,

as politicians point to geoengineering for an answer rather than tackling the real cause of climate change: human activity.

Test 1: Reading

Questions 35-40

Classify the following as typical of

A land-based reflection

B atmospheric reflection

C carbon capture

Write the correct letter, A, B or C, next to Questions 35-40.

35 removes carbon dioxide as soon as it is produced

36 increases the reflectivity of white clouds

37 cleans carbon dioxide from the air naturally

38 would increase the number of small plants and animals in the sea

39 may help prevent rising water levels

40 is similar to the effect volcanoes have on the atmosphere.

WRITING

WRITING TASK 1

You should spend about 20 minutes on this task.

The table below shows the change in some household types in Great Britain from 1971 to 2007.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

PEOPLE IN HOUSEHOLDS BY TYPE OF HOUSEHOLD AND FAMILY

Great Britain: household types

Percentages

	1971	1981	1991	2001	2007
One person	6	8	11	12	12
One-family households					
Couple					
No children	19	20	23	25	25
Dependent children	52	47	41	39	36
Non-dependent children	10	10	11	9	9
Lone parent	4	6	10	12	12

WRITING TASK 2

You should spend about 40 minutes on this task.

Write about the following topic:

Tourism is one of the fastest growing industries and contributes a great deal to economies around the world. However, the damage tourism can cause to local cultures and the environment is often ignored.
To what extent do you agree or disagree?

Test 1: Speaking

SPEAKING

PART 1: Introduction and interview

Listen to Track 05, pressing pause after each question to answer.

05

PART 2: Individual long turn

Before you read the task card, listen to Track 06.

06

Describe a well-known person you admire.

You should say.

who this person is

what this person does

why this person is well known

and explain what it is about this person you admire.

PART 3: Two-way discussion

Listen to Track 07, pressing pause after each question to answer.

07

TEST 2

LISTENING

SECTION 1

Questions 1-10

Questions 1-3

Choose the correct letter, A, B or C.

Example

Seb's course looks like it will be

A too difficult.

B too easy.

C enjoyable

1. Some of Lydia's classmates

A are going into town later.

B have already been into town,

C haven't got time to go out.

2. Seb says he

A is cooking a meal for his host family

B doesn't think he'll want to eat in town.

C has already eaten.

3. Lydia's teacher

A has asked her to do some shopping.

B advised her not to stay out late.

C told her the shops stay open Longer that evening

Test 2: Listening

Questions 4-7

Complete the notes below.

Write **NO MORE THAN THREE WORDS AND/OR A NUMBER** for each answer.

YOUR HOST FAMILY DETAILS

Your host family are Mr and Mrs Andrews.

Address	4.....M ay weather Road, Coldfield
Bus service	Number 5.....
Local landmarks	The house is opposite the 6.....
Telephone number	01764 7.....

Question 8

Choose the correct letter, A, B or C.

8 Lydia needs to find

- A a stationer's.
- B a grocer's.
- C a chemist's.

Questions 9-10

Complete the sentences below.

Write **NO MORE THAN THREE WORDS** for each answer.

9 Seb is looking for a.....

10 They both have a voucher for the in the city library.

09

SECTION 2

Questions 11-20

Questions 11-16

Choose the correct letter. A, B or C.

11 The self-access centre

A is always available.

B is generally quiet,

C gets busy during exams.

12 The Internet PCs

A should be used for no more than half an hour.

B must not be used to access Facebook.

C are generally used to study English.

13 Usernames and passwords

A are created by the teachers.

B are issued during induction,

C are created by students.

14 The help desk

A is staffed by technicians.

B offers language support.

C is only open when two members of staff are available.

15 Photocopying of reference books

A is not allowed.

B is done by teachers,

C has a small cost.

16 The high-spec PCs

A can be used to browse the internet.

B are available for word processing.

C may need a CD-ROM

Test 2: Listening

Questions 17-20

Complete the sentences below.

Write NO MORE THAN THREE WORDS AND/OR A NUMBER for each answer.

- 17 Students can purchase a..... from the help desk.
- 18 The graded readers can be borrowed for a maximum of.....
- 19 The centre opens at 8.30 and closes at....., Monday to Friday.
- 20 On occasion the room isby a teacher and might not be available.

10

SECTION 3

Questions 21-30

Questions 21-24

Choose the correct letter, A, B or C.

21 Jacob says that

- A he needs to do more research.
- B he read widely before writing the draft.
- C he isn't confident about his main points.

22 The tutor thinks Jacob

- A has presented both sides of the argument well.
- B needs to do more work on the content,
- C has organised the essay very well.

23 The ideas Jacob expresses in the essay

- A should be re-ordered.
- B are poorly presented,
- C don't make sense.

24 The tutor suggests that Jacob

- A look at the use of paragraphs in other pieces of writing.
- B read one or two textbooks on writing skills.
- C read widely to develop his vocabulary.

Questions 25-27

*Complete the tutor's notes below.**Write NO MORE THAN THREE WORDS for each answer.*

Very natural use of 25..... Well done!

Try using higher level 26..... in your essays.

The sentences are sometimes too 27.....

SECTION 4

Questions 31-40

Questions 31-34

Choose the correct letter, A, B or C.

31 Work experience is required

- A to get a professional job.
- B to do a postgraduate degree,
- C to join an undergraduate course.

32 Graduates on placements

- A develop skills employers require.
- B are transferred to various posts.
- C should avoid making too many demands on employers.

33 Placements can offer the opportunity

- A to make an impact on the working environment.
- B to get to know important people in the area of work.
- C to meet new and interesting people.

34 Placements can lead to

- A future employment with the same organisation.
- B a better class of postgraduate degree.
- C greater influence with large organisations.

READING

READING PASSAGE 1

You should spend about 20 minutes on Questions 1-12, which are based on Reading Passage 1 on the following pages.

Questions 1-5

Passage 1 has six paragraphs, A-F.

Choose the correct heading for paragraphs A-D and F from the list of headings below.

Write the correct number, i-ix, next to Questions 1-5.

List of Headings

- i. Improvements to faba bean farming
- ii. Increasing productivity to secure the future of Legume farming
- iii. The Importance of legumes
- iv. The nutritional value of legumes
- v. The effect of farming on the environment
- vi. Legumes in the diet of ancient peoples
- vii. The importance of reducing meat consumption
- viii. Archaeological discoveries
- ix. Legumes as a provider of protein

- 1 Paragraph A
- 2 Paragraph B
- 3 Paragraph C
- 4 Paragraph D

Example
Paragraph E

Answer
i

- 5 Paragraph F

Test 2: Reading

A The health benefit of legumes has been widely known for centuries. Also known as pulses or, more commonly, beans, they belong to an extremely large category of vegetables containing over 13,000 species. Only grains supply more calories and protein to the world's population. Today, agricultural researchers and scientists are experimenting with varieties of legumes that are easier to harvest, more resistant to disease and yield better crops.

B Beans are often referred to as 'the poor person's meat' but this label is unfair - considering the health benefits of legumes, they should really be called 'the healthy alternative to meat'. Beans contain a rich and varied supply of nutritional

substances, which are vital for keeping in good health. Diets rich in beans are used to help with a variety of health issues including lowering cholesterol levels, improving blood sugar control in diabetics, reducing the risk of many cancers, lowering the risk of heart disease and lowering blood pressure. Beans are a good source of protein but are often considered to be an 'incomplete' protein as they lack the essential amino acids that we need to complete our diet. Foods from animals (meat, fish, eggs, dairy products), on the other hand, contain protein and amino acids. However, many cultures combine beans with grains to form a complete protein that is a high-quality substitute for meat - rice and soy in Japan, corn and beans in Mexico, rice and lentils in the Middle East. Beans are also a good source of fibre, giving the consumer between 5 and 8.6 grams of fibre per 100 grams eaten. Fibre is an important ingredient in a healthy diet with great benefits to our digestive system and in reducing cholesterol levels, which in turn reduces our risk of heart disease. Fibre also helps US to feel full and control our appetite.

C Why is it important to substitute meat as much as possible? First of all because of the health implications - red meat in particular has a high fat content. Secondly, antibiotics and other chemicals are used in the raising of poultry and cattle. Thirdly, the cost to the environment is much greater in raising cattle than it is in growing crops. To produce a kilogram of beef, farmers need to feed the cow 15 kilograms of grain and a further 30 kilograms of forage.

D Little wonder then that legumes have been used from ancient times. According to Trevor Brice in *Life and Society in the Hittite World*, the Hittites, an ancient people living in Anatolia from the eighteenth century BC, ate a wide variety of legumes including peas, beans, faba beans, chickpeas and lentils. And in ancient Egypt,

Chạm để tiếp cận kho tài liệu IELTS miễn phí

Ramses II is known to have offered 11,998 jars of beans to the god of the Nile. Archaeologists have found the remains of legumes on land beneath Lake Assad in Syria dating back to 8,000 BC and, astonishingly, a 4,000-year-old lentil seed found during an excavation in Turkey has been germinated, allowing scientists to compare the ancient variety with the organic and genetically engineered varieties of today. Professor Nejat Bilgen from Dumlupinar University, who led the archaeological team, said that the lentils were found in a container dating from the Bronze age. The plant grown from the ancient lentil was found to be 'pretty weak' in comparison with modern varieties.

E Modern agricultural research has tended to focus on grain production, breeding new varieties of wheat and other crops rather than improving the varieties of legumes, which can suffer from low yields and unstable harvests. For this reason, farmers started to abandon them in favour of more dependable crops, which had had the benefits of scientific improvement. Recently, scientists have returned to legumes to identify desirable characteristics such as height, good crop production and resistance to pests in order to cross different plants with each other and produce a new, improved variety. Using traditional breeding methods agricultural scientists are transforming the faba bean into a variety that is easier to grow. Traditional varieties are undependable as they rely on insects to pollinate them. But faba bean types that can self-fertilise naturally were discovered and this gene is being bred into new varieties, other faba bean varieties have been found that produce higher yields or shorter crops. Faba bean plants tend to grow tall and fall over in the field making them difficult to harvest mechanically so breeding plants that are 50% shorter means they are more stable. Unlike the traditional plants, the new faba bean plants end in a flower - this means that more of the plant's energy is transformed into producing beans instead of unusable foliage.

F With the new varieties, farmers in some regions are achieving a marked rise in production - between 10 to 20% improvement. Scientists have also managed to develop a commercial faba bean able to resist the parasitic weed Orobanche, which has been known to destroy whole fields of the crop. The future of legumes and the farmers who grow them is becoming brighter. Legumes are an important source of nourishment for humans and also for the soil: the beans take nitrogen directly from the atmosphere and fix it into the soil to provide nutrients for other crops and save the farmer the cost of artificial fertiliser. Making legumes a profitable crop for the future may prove an essential factor in feeding growing populations

Test 2: Reading

Questions 6-11

Do the following statements agree with the information given in Reading Passage 1?
Write

TRUE if the statement agrees with the information

FALSE if the statement contradicts the information

NOT GIVEN if there is no information on this

- 6 Legumes are second to grain in providing people with calories and protein.
- 7 Beans can help to cure heart disease.
- 8 Antibiotics are used when farming animals for food.
- 9 Scientists have the opportunity to see how similar modern and ancient lentil plants are.
- 10 Agricultural scientists are making the faba bean easier to grow in dry areas.
- 11 New varieties of faba bean can destroy parasitic weeds.

Question 12

What is the best title for Reading Passage 1?

Choose the correct letter A, B or C.

- A The health benefits of beans and pulses
- B Diet in ancient times
- C Agricultural scientists give legumes a new lease of life

READING PASSAGE 2

You should spend about 20 minutes on Questions 13–29, which are based on Reading Passage 2 below.

What is dyscalculia?

When you look at the morning newspaper or check a news webpage, numbers are everywhere: the date is 12th September; it's 16°C in London; England lose 2–1 at football; the time is 12.30. But for people with dyscalculia, dealing with numbers presents a particular everyday difficulty. Dyscalculia is a learning difficulty in mathematics. It was originally uncovered by Kosciuszko – a Czech researcher – after research into damage to parts of the brain involved in mathematical cognition. Dyscalculia can have two causes: brain damage or 'acquired dyscalculia' and developmental dyscalculia – or dyscalculia from birth. Whichever the cause, dyscalculia has three features: problems with mathematics; problems with mathematics only, not other areas of learning; and the assumption that these problems are rooted in brain activity.

Unlike dyslexia – difficulties with words – dyscalculia has been relatively little studied until recently. Very little is known about its causes, prevalence or how to treat it. Estimates indicate that between 3% and 6% of the population could be affected. The figures refer to children who only have difficulties with maths but have good or excellent performance in other areas of learning. People with dyscalculia have difficulty with the most basic aspects of numbers and mathematics, but this does not mean that the person affected has difficulty with higher mathematical reasoning or arithmetic. In fact, the evidence from brain-damaged dyscalculic people shows that an individual might suffer dyscalculia but can even show great ability in abstract mathematical reasoning.

Dyscalculia appears to be related to an ability shared between humans and many other animals. This is called 'subitizing' and is the capacity to count the number of objects by briefly looking at them. Subitizing seems to be an innate skill present in humans from birth and is a useful survival skill for humans and animals: there is a big advantage in being able to count how many predators or prey there are. Experiments with babies show that we are able to count at a very early age: if a baby sees a doll put behind a screen then another doll is also put behind the screen, the baby expects to see two dolls when the screen is removed. Babies will look longer at things they didn't expect to see, so if the screen is removed and the baby sees only one doll or three dolls, they stare at this unexpected sight longer, proving our ability to count from infancy. Dyscalculia could be explained by the lack of this innate capability. Genetic causes could include known genetic disorders such as Fragile X

<http://IELTS-thudang.com>

Chạm để tiếp cận kho tài liệu IELTS miễn phí

syndrome. However, as well as genetic factors, there could also be environmental causes such as drinking alcohol during pregnancy, which can result in underdevelopment of the brain.

There are many signs of dyscalculia including some well-established and some less well researched. There are a number of symptoms that we are relatively certain of. Firstly, counting: whilst discalculic children can learn the sequence of numbers - 1,2, 3,4,5, etc- they have difficulty counting backwards or forwards, particularly in twos or threes. Secondly, they find learning and remembering number facts difficult and often lack confidence even when they have the right answer. They can't use rules correctly either; for instance they may know that $4 + 2 = 6$ but not be able to see that $2 + 4 = 6$ or understand the concept of addition. Thirdly, they have problems with numbers with zeros and don't understand that the numerals 10,100 and 1,000 are the same as the words ten, one hundred and one thousand. Fourthly, discalculic children may not be good at using money or telling the time. Concepts of speed or temperature may be difficult for them to fully understand. Finally, they may have problems in understanding directions or in following a map.

Diagnosing and treating dyscalculia is not straightforward as there are many reasons for being bad at maths including poor teaching, lack of motivation and inability to concentrate for long periods of time. An important result of present research will be to improve our methods for identifying children with dyscalculia. The treatment of the problem, however, is a different matter. Many people think that, because the cause of dyscalculia is in the brain, it can't be treated. But this is a misunderstanding. Every time we learn a new fact or skill, our brain changes. Furthermore, if we practise a new skill extensively the brain changes considerably. This is related to a property of the brain called 'plasticity', which simply means the ability of the brain to develop and change, particularly during childhood. Dyscalculia could be treated by experiences at home, providing an environment that encourages children to count. Schools could pay more attention to making sure children understand basic mathematical concepts before dealing with more advanced ideas; they should, for example, avoid teaching the division of fractions before ensuring children have understood the concept of division. Teaching maths through a multi-sensory approach using speech, sound, writing and reading simultaneously has been shown to be a good approach. Finally, maths should be taught in short blocks of time and lessons should build on what was taught previously.

Questions 13-16

Complete the sentences below.

Write NO MORE THAN TWO WORDS from the passage for each answer.

- 24 being unmotivated to learn
- 25 the brain developing, especially when young
- 26 not associating words about figures with numbers
- 27 needing practice at telling the time
- 28 using all the senses when doing maths
- 29 poor concentration for longer lengths of time

Test 2: Reading

READING PASSAGE 3

You should spend about 20 minutes on Questions 30–40, which are based on Reading Passage 3 below.

Crowd mapping

One of the most exciting mass movements today is crowd mapping: sharing data collectively to produce a visualisation on a map giving almost-instant information on current events. Crowd mapping produces a picture of events on the ground as they happen by taking text messages and social media feeds together with geographic data to distribute real-time, interactive information on events such as revolutions, wars, humanitarian crises and natural disasters. This new application of social networking can bring fresh insights into events, which can be nearly impossible to cover through traditional methods of journalism where individuals report into a central newsroom. It has the additional advantage of mapping longer-term trends that fall in and out of the news.

Technologies like mobile phones and the world wide web have made it possible for those people caught up in a war or natural disaster to broadcast information from the affected area and for this information to be collected in a way that emergency aid services can use and act on. In a disaster situation the most current information is essential because the needs of, for example, flood victims change minute by minute. It enables response organisations to get an understanding of a crisis situation quickly (thus it is sometimes called *crisis mapping*), give targeted aid to people most in need and form a network of reliable reporters on the ground to check information going to the live updated map. When an emergency situation arises, a small army of volunteers comes together to collect incoming information and put it on the map. Some of the information comes from official sources such as the United Nations, but the most powerful aspect of data collection is the ability to pull information from Twitter posts, emails and text messages. Once this information is available, volunteers collaborate via the Internet to put data on to a map, which is updated every second to build a comprehensive picture of the scale and severity of the disaster. Volunteers from all over the world translate the messages coming in from the disaster zone into English and plot the information on the live interactive map.

One of the originators of crowd mapping is Ushahidi. The developers of crowd mapping software began the project in Kenya to map reports of violence after a controversial election result in 2008. Later, in 2010 in Haiti, a similar approach of collectively sharing information to help emergency services deal with the situation

Chạm để tiếp cận kho tài liệu IELTS miễn phí

was adopted. A small team released a free phone number - 4636 - to allow victims of the 7.0-magnitude earthquake to text their requests for medical aid, water and shelter. Over 1,000 workers and volunteers around the globe, contacted via Facebook, translated the messages, mostly in Haitian Creole. They then prioritised and geolocated the requests for help via crowd mapping software. Through this service, emergency response teams were able to save the lives of hundreds of people and send food, water and medicine to tens of thousands. The success of Project 4636 led to the development of crowd mapping when dealing with critical and even non-critical situations.

Most recently, crowd mapping has been used to track violent activity in warzones and areas with uprisings. In one country, when the people rose up against their leader, the United Nations monitored the escalating violence via a crowd map to provide them with information on what was happening in the country. In another country, rebel fighters reported people who were missing, killed or arrested according to eyewitnesses, other uses for the software have included the Danish people's attempt to map the extent of CCTV surveillance in their country. Since the project began, 2,220 CCTV cameras have been photographed and verified by journalists. However, not all attempts at crowd mapping have been successful. The attempt to map an uprising in one country was cut short when the authorities took the country offline and, when the Internet was brought back, the crowd map had been forgotten.

There are other downsides to crowdmapping. According to George Chamales, there are security challenges: it must be ensured that the system stays operational and that the information collated is not misused. Firstly, the lead crowd map tends to be the one that is set up first and has the most users. Unfortunately, the organisation behind the first crowd map may not be the best one to manage the complex process of collecting and managing the data. Secondly, there are several platforms for producing crowd maps including commercial products and open source projects like Ushahidi. Some have even been developed for a particular crisis such as the nuclear meltdown in Fukushima - all of these have their own disadvantages: commercial software may need to patch bugs in the programme; open source software may overlook security in favour of functionality. The information collected needs to come from trustworthy sources, which are then relied on for more reports; this may make the person sending the report a potential target in war situations. Finally, there is the human element in processing the information, relying on thousands of volunteers to translate, categorise and prioritise the information. There is an obvious risk in giving strangers access to messages generated in dangerous circumstances: messages may be deleted and the sender's identity may be compromised.

While the introduction of any new technology has flaws, George Chamales believes that crowdmapping cannot afford to go through the same maturation as other

technologies: the risks to people using it in hostile political situations are too great and could lead to them being arrested or killed. Furthermore, over time the technology may be labelled as dangerous, leading organisations to shun an extremely useful instrument. The answer, Chamales believes, can be found in developing standards through collaboration between IT security experts and the crowdmapping movement. New challenges and issues will arise with each crisis mapped by the people affected, but George Chamales thinks that establishing security standards would be a good starting point to allow this valuable new form of networking to evolve.

Test 2: Reading

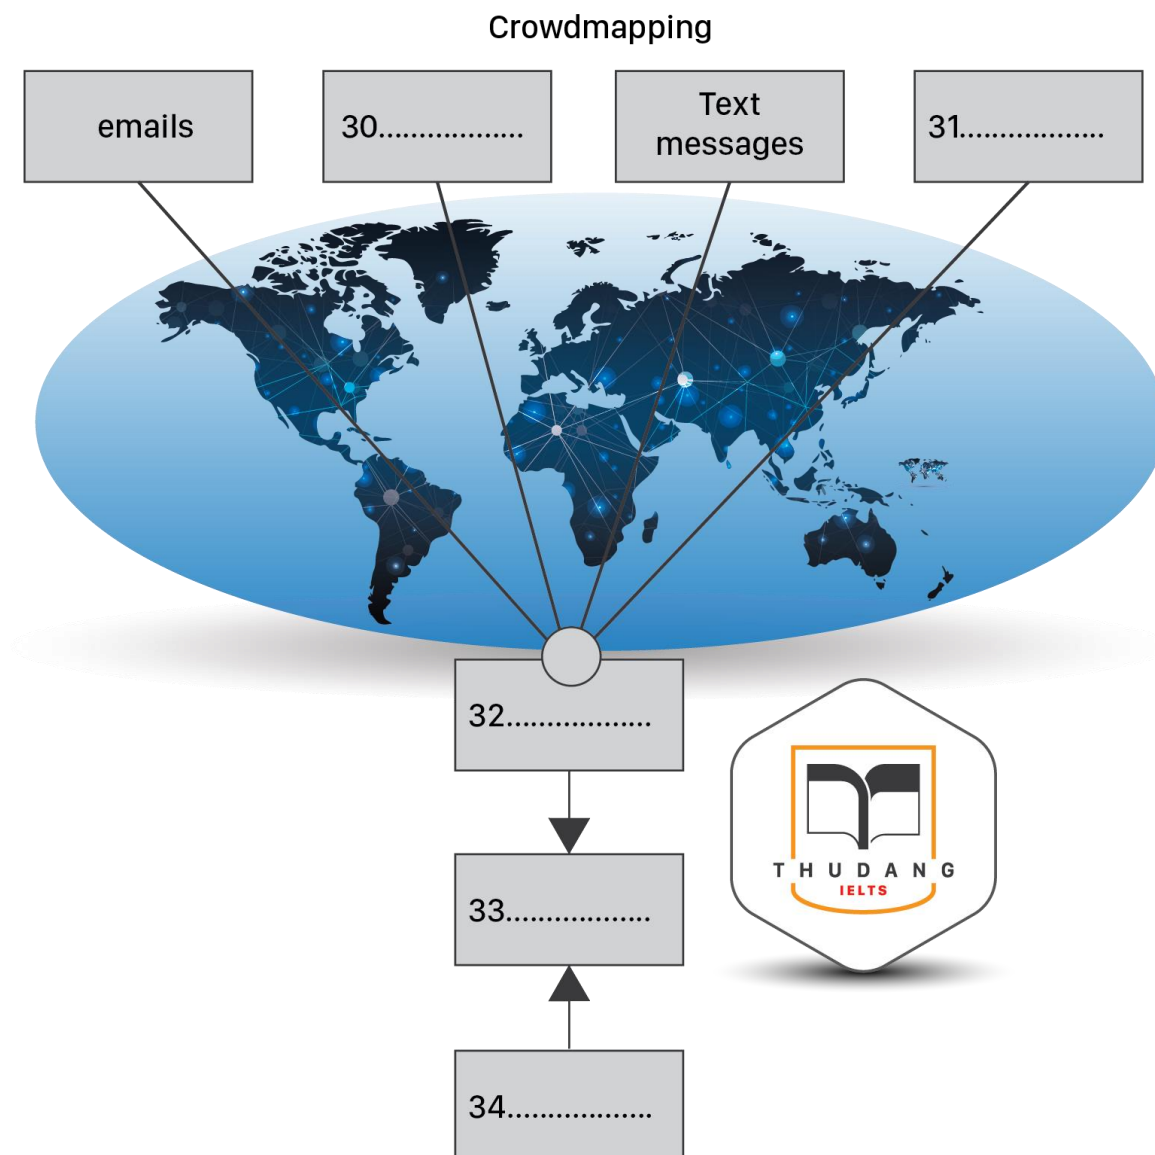

Questions 30–34

Label the diagram below using words from the box.

Write the correct letter, A–E, in spaces 30–34.

Crowdmapping actions

- A interactive map
- B social media feeds
- C emergency services
- D volunteers collect and translate
- E official sources

Questions 35–40

Choose the correct letter, A, B, c or D.

- 35 Crowdmapping aims to produce data on
A historical and future patterns of behaviour.
B political events.
C interactive maps.
D events after earthquakes only.
- 36 Crowdmapping allows emergency services to
A contact journalists.
B help everyone who needs it.
C check information online.
D act quickly in specific areas.
- 37 The operation relies heavily on
A a project in Kenya.
B a small team.
C people translating messages.
D emergency response teams.
- 38 The fourth paragraph contains examples of crowdmapping in
A countries with no internet access.
B natural disasters.
C areas of conflict.
D a country with a lot of traffic cameras.
- 39 Which is NOT a disadvantage of crowdmapping?
A the inability of some organisations to handle the data effectively
B unreliable information
C security being compromised
D computer crashes
- 40 What is the best way to deal with the problems associated with this new technology?
A wait for problems to be resolved
B arrest people using it incorrectly
C agree common practices to make crowdmapping secure
D change the process when new problems arise

Test 2: Speaking

SPEAKING

PART 1: Introduction and interview

Listen to Track 12, pressing pause after each question to answer.

PART 2: Individual long turn

Before you read the task card, listen to Track 13.

Describe a hobby you had as a child.

You should say:

what the hobby was

how old you were when you had the hobby

how you spent your time on the hobby

and explain what it was about the hobby that interested you.

PART 3: Two-way discussion

Listen to Track 14, pressing pause after each question to answer.

TEST 3

LISTENING

15

SECTION 1

Questions 1-10

Questions 1-4

Complete the form below.

Write **NO MORE THAN THREE WORDS AND/OR A NUMBER** for each answer.

Example	Answer
Model	<i>Ford Fiesta</i>
Registration	3R11.....
Current mileage	2.....miles
Estimated yearly mileage	6,000 a year
Overnight parking	3.....
Cover	Third party 4.....
No claims bonus	6 years

Questions 5-7

Choose **THREE** letters, A-G.

Which additional cover does Liam want?

- A Legal
- B 14-day cover courtesy car
- C Driver Injury
- D Protected no claims bonus
- E Breakdown
- F Lost car key
- G Windscreen

Questions 8-10

Complete the form below.

Write NO MORE THAN THREE WORDS AND/OR A NUMBER for each answer.

Name	Liam Byrd
Address	35 Bottiville Crescent, Birmingham
Postcode	8.....
Date of birth	11/11/1969
Tetephone	0121 677 9887
Payment by	9.....
Card number	**** * 15 5 1
Security number	***
How did the customer hear about Hartline?	10.....

16

SECTION 2

Questions 11-20

Questions 11-14

*Complete the sentences below.**Write NO MORE THAN THREE WORDS AND/OR A NUMBER for each answer.*

- 11 Every year more than people try to climb Mont Blanc.
- 12 Approximatelyreach the top every day in the summer months.
- 13 In July 2007 there were 30 fatalities, chiefly due to
- 14 One danger iscaused by other climbers.

Questions 15-17

Choose the correct letter, A, B or C.

- 15 How did Katherine do her most recent climb?
- A in a group
- B with a guide
- C on her own
- 16 Why did Katherine find her first climb of Mont Blanc difficult?
- A because of poor weather conditions
- B because of the time she was climbing
- C because the route was crowded
- 17 What did Katherine do on her second climb that made it easier?
- A She spent a few days in Chamonix beforehand.
- B She did the climb over two days.
- C She climbed smaller peaks for training.

SECTION 3

Questions 21-30

Questions 21-23

Write **NO MORE THAN THREE WORDS** for each answer.

21 When do Elaine and Adam decide to meet for revision?

.....

22 What item does Adam think will help them work independently on revision?

.....

23 How does Elaine suggest they spend their revision time between meetings?

.....

Questions 24-28

Complete the sentences below.

Write **NO MORE THAN THREE WORDS** for each answer.

24 It's best to avoid taking notes.....

25 Relateto key theories and arguments.

26 Using diagrams can help keep a lot of information.....

27 Bullet points can enable you to highlight.....

28 Keep a record of your sources, such as the.....

Questions 29-30

Choose the correct letter. A, B or C.

29 In future revision sessions Adam suggests using past papers

A to try to predict future exam questions.

B to test each other.

C to discuss the questions.

30 Elaine suggests

A adding essay practice to the timetable.

B doing essays under exam conditions.

C asking a tutor to mark their essays.

SECTION 4

Questions 31-40

Questions 31-33

Choose the correct letter, A, B or C.

- 31 According to the text, shared space
- A is very popular in the Netherlands.
 - B reduces the number of cars in an area.
 - C improves the dynamic between drivers and pedestrians.
- 32 Shared space design results in
- A fewer road signs.
 - B stronger boundaries between pedestrians and motorists.
 - C increased local employment.
- 33 Supporters of shared space argue that it
- A Leads to new businesses opening.
 - B makes people happier to shop in the area.
 - C encourages wildlife.

Questions 34-37

Match the groups A-D with their concerns about shared space 34-37.

- A Motorists
- B Blind people
- C Cyclists
- D Supporters of shared space

- 34 Insufficient experience amongst planners
- 35 A lack of important signage
- 36 Intimidation by motorists
- 37 The Loss of familiar street furniture

Questions 38-39

Choose TWO letters, A-D.

People will be able to answer the questions

- A on the Internet.
- B at the local library.
- C at the proposed site.
- D at home.

Question 40

Choose the correct letter, A, B or C.

Questions must be designed so that they

A do not reflect the views of the campaign group.

B do not require an understanding of shared space,

C are easy to answer

Test 3: Reading

READING

READING PASSAGE 1

You should spend about 20 minutes on Questions 1–12, which are based on Reading Passage / below.

Seas beneath the sands

A Look at a map of North Africa from Egypt to Algeria. Almost everything outside the Nile Valley and south of the coastal plain appears to be lifeless sand and gravel deserts. But peer deeper, under the sand, and you will find water. Under the Sahara lie three major aquifers, strata of saturated sandstones

and limestones that hold water in their pores like a wet sponge. The easternmost of these, extending over two million square kilometres, contains 375,000 cubic kilometres of water—the equivalent of 3,750 years of Nile river flow. It is called the Nubian Sandstone Aquifer System, and lately it has come to the attention of practitioners of a subspeciality of nuclear science known as isotope hydrology.

- B Isotope hydrology, which studies the atoms of the two elements making up groundwater— oxygen and hydrogen—and the trace elements in it, like carbon and nitrogen, is able to determine when, give or take a couple of thousand years, today's ground water fell to earth as rain. In the case of the Nubian Aquifer, some water in the system is thought to be one million years old, but most of it fell between 50,000 and 20,000 years ago. Since then, as the region has slowly turned to desert, there has been little addition of water to the aquifer. What lies beneath the ground is called fossil water, and it will likely never be recharged.
- C Because the Nubian Aquifer is shared among four nations, and because Libya and Egypt are now going forward with big water-pumping projects that tap the Nubian Aquifer, the International Atomic Energy Agency (IAEA), co-recipient of the 2005 Nobel Peace Prize, is trying to bring the countries together in a joint

effort to plan for a rational shared use of the water.

- D The stakes are certainly high. Egypt eventually hopes to use almost half a billion cubic metres of groundwater annually—more than the volume of Lake Erie. Libya is already pumping water from the Kufra Oasis, in its southeast corner, through a four-metre-diameter pipeline to its thirsty coastal cities. When fully operational, that project will pump some 3.6 million cubic metres per day. still, at current extraction rates, the aquifer is not likely to be depleted for a thousand years.
- E Dr Taher Muhammad Hassan of the EAEA (Egyptian Atomic Energy Authority) says "One thing that isotope studies have shown US is that there is surprisingly little aquifer recharge from the Nile. Nile water has a younger isotopic profile, and samples from wells dug as close as five kilometres from the river show no sign of the Nile fingerprint. In fact, some of that well water is dated at 26,000 years old." Hassan is confident there is little likelihood of international conflict over aquifer sharing. "We know that the velocity of underground flow in most places is just two metres a day," he says. "It's like sucking a thick milkshake through a straw—it doesn't happen fast, and eventually it stops completely." Even Libya's big extraction plans for Kufra will probably have only a minor effect on Egypt's East Uweinat farming area, given the distance between the two. If Kufra's water table drops 200 metres, the Egyptian side might see a drop of only 10 centimetres.
- F At al-Agouza West in Egypt, a 10-story drilling rig, the same kind used to drill oil wells, has reached 800 metres and is now evacuating the drilling mud and widening the bore. It has taken 20 days to penetrate layers of shale and clay to reach the saturated sandstone—the basement of the Nubian formation is some 1,800 metres deep here—at a cost of about \$400,000. Once the well is ready for testing, the ministry engineers check its static and dynamic levels with a sounder, a kind of fisherman's bob at the end of a tape measure that rises and falls with the water table.
- G Dr Khaled Abu Zeid, of the Egyptian non-profit Center for Environment and Development of the Arab Region and Europe (CEDARE), stresses the social context of water-resource development, and the need to keep in mind traditional water users as well as new users. Small farmers and Bedouin who rely on shallow wells should not be ignored in favour of the big development schemes. "They need water today," he says, "and will still need it tomorrow. We must not let it run dry because deeper wells are more cost-effective. But neither should we have an absolutist conservationist approach, in which we try to keep fossil water in some kind of 'museum' for their benefit."
- H The director of the Groundwater Research Institute at the Nile Barrage, Dr Ahmed Khater, finds it ironic that in a desert region like the Middle East, petroleum geology is much better understood than subsurface hydrology. "But water is what makes our life possible here, and we must use it wisely," he says. He cites

the experience of President Nasser's "New Valley" project in the 1960s, which proposed a massive resettlement of Nile Valley farmers to the western oases. It was a failure. "These isotope studies hold the promise of learning more about what is really our most precious asset—water, not oil," he says. Nasser, he notes, got the New Valley project's motto wrong. "He said, 'When settlers come, then we will find water.' He should have said, When we find water, then settlers can come.'

Test 3: Reading

Questions 1-4

Complete the table below.

Choose **NO MORE THAN THREE WORDS** from the passage for each answer.

Nubian Sandstone Aquifer system	
Extent	1..... 375,000 km ³ of water
Formation	The majority of the 2.....between 50,000 and 20,000 years ago
Flow	water moves only 3..... a day in most places
Depth	The 4of the formation is 1,800 metres deep.

Questions 5-12

Reading Passage 1 has eight paragraphs, *A-H*.

Which paragraph contains the following information?

Write the correct letter, *A-H*, next to Questions 5-12.

- 5 dating the age of the water
- 6 understanding underground water through studying isotopes
- 7 the process of water collection
- 8 review of the likelihood of conflict
- 9 the importance of water for North-Saharan countries
- 10 layers of porous rock holding water under the desert
- 11 attention to the needs of local people
- 12 cross-country project for the use of water

READING PASSAGE 2

Ton should spend about 20 minutes on Questions 13-27, which are based on Reading Passage 2 below.

High intensity training

Endurance vs intensity

The traditional view of exercise is that more is better. But now a new form of exercise is challenging the old view and causing debate between traditionalists and proponents of a new form of exercise, High Intensity Training (HIT). Current recommendations from the US Department of Health and Human Services say adults aged between 16 and 64 should take two kinds of exercise every week: aerobic and muscle-strengthening. Aerobic exercise covers activities that make you breathe harder and your heart beat faster – activities such as walking quickly, swimming or playing a relaxed game of tennis. Muscle-strengthening exercises work all the major muscle groups in a person's body – legs, hips, back, chest, abdomen, shoulders and arms. The US Department of Health and Human Services recommends that adults do two hours and thirty minutes of moderate-intensity aerobic activity per week and muscle strengthening activities on at least two days per week. A lot of people, perhaps understandably, never meet these targets, usually citing lack of time as the main reason.

However, a recent study has removed the old excuse. Professor Martin Gibala, from Canada's McMaster University, has published research in the Journal of Physiology that shows doing less exercise can be more effective than time-consuming periods of aerobic and muscle-strengthening activities. High Intensity Training is very simple: it involves a warm-up period followed by a short burst of intense activity, usually 30 seconds to one minute, then a recovery period where you exercise at a gentler pace for a couple of minutes, then another short period of high-energy activity. After a second recovery phase, there is more energy-intensive exercise before slowing down for a while, then stopping. That's all your exercise for the day. This cycle of warm up / intense activity / recovery / intense activity, etc can be applied to a variety of sports such as cycling, jogging and swimming.

How does it work?

There are a number of different explanations as to why HIT seems to be more effective than endurance exercise. Firstly, exercising at low intensity only burns calories while you are active so that the minute you stop, you also stop burning calories. In contrast, high-intensity exercise continues to work on your metabolism a long time after you have finished – and this can be up to 24 hours later – so that

<http://IELTS-thudang.com>

Chạm để tiếp cận kho tài liệu IELTS miễn phí

you continue burning calories for longer. Secondly, HIT builds your muscles, replacing fat with muscle mass. The third theory is that the sprint-and-recover cycle doesn't give the body the chance to store energy in the same way as training over a long period: the body needs to use all the energy in one go rather than maintain the same energy level over a longer period and still being able to reserve some as fat. The final theory is HIT combines both aerobic and muscle-strengthening activities and uses many more muscles than regular exercise - up to 80% of the muscles in the body, compared with up to 40% for moderate jogging or cycling.

There have been numerous experiments into HIT. In one conducted by a team from the University of Colorado led by Kyle Sevits, five male volunteers were tested to measure the number of calories a typical HIT workout burns. The volunteers, aged between 25 and 31, were tested to make sure their hearts were healthy, and their body composition and resting metabolic rates were measured. The participants ate a specific diet, then taken to a hospital room where researchers were able to control the air intake and determine the oxygen, carbon dioxide and water content of the air. Through these indices researchers were able to measure how many calories the volunteers burned. While each person lived in the room, they were kept on their strict diet and could only watch TV or use a computer. However, on one day they were asked to participate in HIT on a gym bike, pedaling as fast as they could for five 30-second periods with four-minute recovery periods between. The results were startling: the volunteers burned an average of an extra 200 calories on the workout day in spite of doing high-intensity activity for just 2.5 minutes. Other experiments have revealed similar results. In Japan, a team from the National Institute of Fitness and Sport separated individuals into two groups. The first group trained five days a week over six weeks, taking an hour of moderate-intensity exercise per day, totally five hours per week. The oxygen intake of this group improved by an average of 9%. The second group's training sessions were eight 20-second intense workouts followed by ten seconds of rest. Their oxygen intake improved by 15%.

Benefits to health

Good oxygen intake is a sign of a healthy adult but the workout routine has shown

other health benefits in diabetes. Scientists at Herriot Watt University in Edinburgh found that short bursts of high-intensity activity every few days reduced the risk of contracting diabetes due to the beneficial effects on blood sugar. Similarly, a study in 2011 by Professor Gibala found that insulin sensitivity improved by 35% after just two

Test 3: Reading

weeks, which is important in enabling glucose digested from food to get to our cells and provide energy. Endurance is also increased: one study in 2006 found that eight weeks of doing high-intensity workouts meant subjects could exercise twice as long as they could before the study, while maintaining the same pace. Additionally, HIT increases the fat burnt and sustains more muscle. Finally, HIT stimulates production of human growth hormone (HGH) by up to 450% during the 24 hours after the workout has finished. HGH - is not only responsible for increased calorie burning but also slows down the ageing process. It seems that HIT could keep US fitter and younger for longer.

Questions 13-17

Do the following statements agree with the information given in Reading Passage 2?

Write

TRUE if the statement agrees with the information

FALSE if the statement contradicts the information

NOT GIVEN if there is no information on this

13 The traditional view of exercise questions the effectiveness of long periods of activity.

14 Aerobic exercise includes tennis, walking and football.

15 Many people fail to do the recommended amount of exercise.

16 Some now believe that being active for shorter periods is better for our health,

17 HIT involves a 10-minute cool-down period.

Questions 18-22

Choose the correct letter, A, B, C or D.

18 Low-intensity activity

A burns calories after you stop.

B lets the body store fat.

C doesn't take much time.

D uses all the body's energy reserves.

19 High-intensity training

A retains both muscle and fat tissue.

B is only good for muscle-building.

C makes use of under half of our muscles.

D is done in cycles of rest and activity.

20 In one experiment, participants

A were all middle aged.

B were slightly unhealthy.

C ate a high-fibre diet.

D were kept in a controlled environment.

21 Researchers measured

A the air intake.

B how much TV they watched.

C how fast they pedalled.

D how much energy they used.

22 In the Japanese experiment

A there were two groups of men.

B the groups trained simultaneously.

C scientists measured the amount of oxygen used in training,

D both groups had intensive training sessions.

A study has found that HIT 23..... the chance of getting diabetes. Another study found that HIT improves 24..... enabling individuals to exercise for longer periods while 25..... a similar pace. More fat is 26..... and the 27 of human growth hormone increases enormously.

READING PASSAGE 3

You should spend about 20 minutes on Questions 28-40, which are based on Reading Passage 3 on the following pages.

Questions 28-32

Passage 3 has six paragraphs, A-F.

Choose the correct heading for paragraphs B-F from the list below.

Write the correct number, I - IX. next to Questions 28-32.

List of Headings

- i. The collapse of the Neanderthal population
- ii. The origin of modern humans
- iii. Humanity's prehistoric mother
- iv. Routes out of Africa
- v. Attributes of humans and Neanderthals
- vi. The human migration
- vii. What did Neanderthals look Like?
- viii. The diversity of African populations
- ix. Tracing back our DNA

Example	Answer
Paragraph A	ii

- 28 Paragraph B
- 29 Paragraph C
- 30 Paragraph D
- 31 Paragraph E
- 32 Paragraph F

- A Among prehistoric archeologists, Ksar Aqil has an almost mythical status, but the site is little known outside professional circles. The migration of modern humans out of Africa and the Near East's position as a bridge between continents and cultures, as well as nearly a century of scientific research, are all woven into the story of Ksar Aqil. Current perspectives on human evolution and mankind's colonization of the globe are based upon fossil evidence, as well as excavated artifacts and biogenetic data. These lines of inquiry indicate a relatively recent evolution of modern humans, *Homo sapiens sapiens*, in Africa about 200,000 years ago.
- B The latest, and arguably most powerful, analytical tool available to those investigating human origins comes from molecular biology. Geneticists have found that examination of the DNA from tiny structures inside the cell, called mitochondria, provided a means to measure human biogenetic relationships on a time scale spanning hundreds of thousands of years. Mitochondria, also known as the powerhouse of the cell because they generate chemical energy, possess their own genome, and mitochondrial DNA (mtDNA) is inherited exclusively from the mother. Dramatic results released in 1987 by researchers at the University of California at Berkley indicated that all mtDNA present in people today stems from a single female who lived about 200,000 years ago in Africa. This woman was called "Mitochondrial Eve," the genetic mother of all of earth's present-day population.
- C Tens of thousands of years before Beirut became a meeting place of East and West, the Levantine coastal strip and the Arabian Peninsula to the south were corridors through which our common ancestors moved out of Africa and into Asia, Europe, Australia and, lastly, the Americas. The region also has the distinction of being a place where Neanderthals (*Homo sapiens neanderthalensis*) and our immediate ancestors coexisted and indeed interbred. Although the evolutionary split between Neanderthals and the ancestors of modern humans occurred sometime between 440,000 and 270,000 years ago, according to research, a little Neanderthal DNA, between one and four per cent, exists in all peoples alive today, except for those in Africa. It is probable that our Neanderthal heritage resulted from interbreeding that happened in the Near East

sometime between 80,000 and 45,000 years ago.

- D According to proponents of the "out of Africa" theory, the exodus of anatomically modern humans probably occurred in waves. One early migration into the Near East occurred prior to 130,000 years ago, and an examination of a modern map of the Horn of Africa and adjacent parts of Arabia shows there are two obvious routes this migration could have taken. One involves crossing from northern Egypt into the Sinai Peninsula, the other crosses the Bab el-Mandab strait to reach modern-day Yemen, perhaps by watercraft. It is likely that both these routes were taken at different times, as they were navigable, presented no significant hazards and were frequented by the animals our early ancestors tracked and hunted. Given the geographic position of the Near East as a bridge between Europe and Asia, this region formed the trunk through which our family tree branched out from its African roots, both geographically and genetically. When modern humans entered the area over 130,000 years ago, the Neanderthals were in residence, and it seems they curtailed the extent of the newcomers' settlement for a while. When another wave of modern humans began migrating from Africa about 50,000 years ago, perhaps due to population pressure on resources and territory, our ancestors ultimately became the sole inhabitants of places like Ksar Aqil.
- E If this contest had been based on physical strength alone, the Neanderthals would have won hands down. Modern humans, however, had developed cognitive, physical and cultural abilities that provided an advantage, ultimately leading to the Neanderthals being relegated to geographically marginalized refugees. Neanderthals differed from modern humans in a number of ways, perhaps most noticeably in their skull anatomy, which featured a sloped forehead, a large projection at the back of the skull called an occipital bun, pronounced eyebrow ridges, and no chin. Physically robust and more powerfully built than our ancestors, their massive but relatively short stature was more efficient in cold climates like Europe's. In common with modern humans, they possessed a gene essential for language development, and some paleoanthropologists believe they were capable of complex speech patterns. The Neanderthals apparently were not suited to activities like long-distance running. The energy cost of locomotion was apparently 32 per cent higher in Neanderthals, resulting in a daily dietary requirement between 100 and 350 calories greater than that of modern humans living in similar environmental settings. Our ancestors may, therefore, have had a competitive edge simply by being more fuel-efficient.
- F What exactly happened to the Neanderthals no one knows. Modern peoples migrating into Southwest Asia and on to Europe may have displaced them. Undoubtedly, contact led to a variety of interactions, some clearly resulting in

opportunities for interbreeding, others involving physical conflict and competition for resources. The Neanderthals' demise may also have been linked to rapid climatic swings between 50,000 and 30,000 years ago, which created further pressure on their already divided and isolated populations.

Questions 33—39

Classify the following as typical of

A Neanderthals

B humans

C both

Write the correct letter, A, B or C next to Questions 33–39.

- 33 the ability to develop language
- 34 the absence of one particular facial feature
- 35 the ability to run long distances
- 36 needing to consume lots of calories
- 37 greater physical strength
- 38 being small in height
- 39 making up at least 96% of our genes

Question 40

What is the best title for Reading Passage 3?

Choose the correct letter, A, B or C.

- A The decline of Neanderthal man
- B The site where humans and Neanderthals met and mixed
- C The migration of humans into Europe

SPEAKING

PART 1: Introduction and interview

Listen to Track 19, pressing pause after each question to answer.

PART 2: Individual long turn

Before you read the task card, listen to Track 20.

Describe a possession that is very important to you,

You should say:

what the possession is

how Long you have had it

how often you use it

and explain what it is about this possession that makes it so important.

PART 3: Two-way discussion

Listen to Track 21, pressing pause after each question to answer.

Questions 26–30

Choose the correct letter, A, B or C.

26 The college is trying to

- A significantly reduce the amount of paper it uses.
- B be careful about the amount of documents it produces.
- C discover why students keep losing their work.

27 According to the text, students at the college

- A are not allowed to print documents.
- B have restrictions on how many pages they can print.
- C have to pay to do any printing.

28 The college

- A has permission to reproduce the quizzes.
- B wants the students to give them feedback about the quizzes.
- C thinks the online quizzes are more effective than the paper ones,

29 The tutor explains that

- A the quizzes are easy to find on the intranet.
- B the quizzes will be online for a few weeks only.
- C the majority of the quizzes are online.

30 The online quiz system

- A occasionally doesn't work.
- B keeps the quiz results confidential,
- C allows tutors to identify areas where the students may be having difficulties.

25

SECTION 4

Questions 31-40

Questions 31 – 34

Complete the sentences below.

Write NO MORE THAN THREE WORDS for each answer.

- 31times are less common within the family.
- 32 We may eat more than we need due to our.....
- 33 Eating habits can be affected by both emotions.
- 34 People who areare more likely to eat more due to negative emotions.

Questions 35-39

Answer the questions below.

Which type of hunger relates to the points below?

Write E for emotional hunger. Write p for physical hunger.

- 35 Experiences a sudden urge to eat
- 36 Hungers for any type of food
- 37 Needs to satisfy the hunger as soon as possible
- 38 Will stop eating once full
- 39 Will feel no sense of guilt after eating

Question 40

Choose the correct letter, A, B or c.

- 40 People suffering from obesity can be helped by
 - A taking the pressure off them about feeling guilty.
 - B understanding why they have negative feelings.
 - C pinpointing stressful moments that can cause emotional hunger.

READING

READING PASSAGE 1

You should spend about 20 minutes on Questions 7—76, which are based on Reading Passage 1 below.

Raining Ice

In May 2012, disaster struck a mountainous region of China's Gansu province. 40 people were killed and 29,300 people evacuated when a brief but extremely violent hailstone storm swept across Min County. Houses collapsed, roads were blocked and crops were destroyed. The extreme weather also affected the power supply and communications in the region. When you consider that hailstones can reach sizeable

proportions, the damage they can cause is understandable. The world's largest hailstone was found after a storm in South Dakota and measured 20.5 cm in diameter with a 47 cm circumference - this was after melting caused it to lose 5 cm from its original size. Apart from China and the US, other parts of the world that frequently suffer from hailstorm damage include Russia, India and northern Italy.

Hail is a form of solid precipitation created within cumulonimbus clouds. Cumulonimbus clouds are caused by heating from below and cooling from above. As the earth is heated during the day by the sun, air close to the ground becomes warmer. Hot air is less dense than cold air and therefore lighter so it rises and, as it does so, it becomes cooler. The warm air reaches a cold point called the condensation level where the water vapor condenses and turns back to a liquid form. As the warm air rises to the condensation level, it becomes less able to keep its moisture and condenses into large clouds, which are often called thunderheads. The process of condensation releases heat into the surrounding air making the air rise even faster and release more moisture. These huge clouds are complex systems in their own right, containing large amounts of energy resulting in updrafts and downdrafts - vertical winds that can reach speeds over 176 km per hour and help in the formation of hail.

Hail grows in the thunderhead's main updraft where most of the cloud is

'supercooled' water: water that is still liquid even though its temperature is below 0°C. This water will stay in liquid form until it encounters something on which to freeze. There are other particles within the cloud - small frozen raindrops or soft ice particles - called graupel. When the supercooled water hits the graupel, it freezes around it, creating a hailstone. However, this is just the start of the hailstone's journey. A hailstone's eventual size depends upon the intensity of the storm in which it is born. To form a golf ball-sized hailstone requires over ten billion supercooled drops of water and a time span of between five and 10 minutes. This accumulation of additional ice is a process called accretion and takes place in areas of the cloud rich in supercooled water. Accretion takes place in two ways, resulting in two distinguishable kinds of hailstone. In the first process, strong updrafts, which lift the top of the cloud into part of the atmosphere known as the troposphere, take the hailstone through the supercooled layer where it accretes ice, making it heavy enough to fall back through the cloud. On falling, it encounters other strong updrafts, which take it back through the supercooled layer where it grows and falls again. An updraft of 35-55 km per hour will form small hailstones; hailstones that are 5 cm in diameter require updrafts of 88 kph and hailstones that are 12 cm in diameter need updrafts of 160 kph to grow. The other process involves the hailstone falling slowly through a layer of the cloud rich in supercooled water.

The first process results in hailstones with concentric layers usually alternating between clear and cloudy ice, indicating how it was produced. The opaque layer forms when supercooled water drops freeze quickly onto the growing hailstone and trap tiny air bubbles inside the ice giving it a milky appearance. The next layer - the transparent layer - forms when larger drops of supercooled liquid water hit the hailstone. Here the freezing process is slower, allowing air bubbles to escape and clear ice to form. Hailstones showing little of this layering may have been subject to the second process of formation. Instead of being pushed up through the cumulonimbus by updrafts and pulled back through by gravity several times, these hailstones simply fall slowly through the cloud gathering mass as they drop.

The interior of a cumulonimbus cloud is a place of extreme violence. As the hailstones rise and fall, they collide with each other. The result of this can be their breaking up or the formation of large irregular shaped hailstones. Hailstones are categorised according to their size. The Tornado and Storm Research Organisation classifies hailstorms according to their destructive power, ranging from HO - hard hail composed of hailstones of 5 mm in diameter, which do not cause damage - through H5 storms, destructive enough to damage glass, roofs and injure people, to the most severe - H10 or 'super hailstorms', which cause extensive structural damage and can fatally injure people caught out in the open.

The rate at which they fall varies but can be faster than 160 kph for larger hailstones as they become too heavy for the updraft to support or if a downdraft catches them and blows them violently back to earth. It is estimated that between 40 and 70% of

hailstones never reach the earth, melting instead inside the cloud, colliding with and smashing into smaller pieces on their way through the air, or melting in the atmosphere to fall as rain.

Questions 1-8

Do the following statements agree with the information given in Reading Passage 1?

Write

TRUE if the statement agrees with the information

FALSE if the statement contradicts the information

NOT GIVEN if there is no information on this

- 1 Hailstone storms last a long time and cause considerable damage.
- 2 The world's largest hailstone had lost volume before it was found,
- 3 Cumulonimbus clouds hold significant quantities of energy.
- 4 Cumulonimbus clouds are called 'thunderheads' because they are the cause of thunder and lightening storms.
- 5 Water always turns to ice when it is under 0°C.
- 6 A slow freezing rate creates clear ice.
- 7 Hailstones are classified according to their destructive power.
- 8 Many hailstones stay within the cloud and do not reach the ground.

Questions 9-16

Label the diagram below using words from the box.

Write the correct letter, A-H, in spaces 9-16.

- A graupel
- B updraft
- C condensation level
- D accretion
- E heat released into atmosphere
- F downdraft
- G warm air
- H supercooled area

The formation of hailstones in a cloud

READING PASSAGE 2

You should spend about 20 minutes on Questions 17-27, which are based on Reading Passage 2 below.

Twisted Light

A Why is your mobile phone or wireless signal so slow? If you ask your service provider, they'll tell you that it's the bandwidth. We're running out of signal space on the wireless spectrum. All wireless communications travel through radio or optical frequencies: your TV or radio programmes, your GPS device that helps you find your way, your mobile and smartphone, laptop and wirelessly connected PC. The demands from users and industry on a limited resource, the wireless spectrum, are growing daily and are closely regulated. The reason is that two users cannot use the same signal: think about radio stations, which have to operate on different frequencies otherwise they cause interference with each other. Likewise mobile phone operators cannot transit over the same frequency in the same market at the same time. Government-controlled agencies grant licences to use the wireless spectrum but if a wireless company wants to add more spectrum to its service to boost its capacity, it's likely to be disappointed as there isn't much more available. What is needed is a way of pushing more data through the same amount of bandwidth.

B Now scientists may have found a way of manipulating light waves to carry more information: potentially enough for users to be able to download a film onto a smartphone in a single second. By twisting light waves, scientists could possibly transmit data at speeds of 2.56 terabits per second: that's 85,000 times faster than the 30 megabits per second currently possible. To put it another way, this is the same as transmitting 70 DVDs through the air in about a second. Researchers based in America, China, Israel and Pakistan have built on previous research from Sweden, which negates the need for more bandwidth by making better use of the spectrum. The basis of the research is to manipulate the properties of light.

C One property of light is wavelength: lasers, radio waves, microwaves are simply different wavelengths of light. Light is made up of photons and photons have two other properties that define a beam of light: spin angular momentum and orbital angular momentum. A good way of thinking about how photons travel is

to think of the orbit of a planet: it spins around on its axis (spin angular momentum), and at the same time the planet is also revolving around the sun (orbital angular momentum). The latter force means that light can be twisted around its axis of travel to take the shape of a spiral or a corkscrew. At the centre of the spiral the light waves cancel each other out, leaving darkness in the middle, called an optical vortex. When light travels, it is formed into a spiral shape and it can be manipulated. There are infinite possibilities for ways in which the photon can be made to spiral: clockwise, counterclockwise, tight spirals or loose ones. Each of these spiral states can be uniquely identified but, more importantly for wireless communication, the spirals can be wrapped up within each other - or multiplexed - into a single beam. The beam can be transmitted and unwound at the receiving end to get the data streams back out again, essentially doubling or trebling or even quadrupling the bandwidth.

D. Scientists have been twisting light since the 1970s, and the spin angular momentum of waves is already manipulated in standard wireless communication. For years, Bo Thide of the Swedish Institute of Space Physics theorised that the orbital angular momentum could be used to create the spiral signal or as Thide calls it a 'radio vortex'. Then in an experiment in Venice, his team transmitted two signals simultaneously on the same frequency over a distance of 442 metres. Following on from this, researchers in America, China, Israel and Pakistan, led by Alan Wilner, twisted together eight light data streams, each stream with its own level of orbital angular momentum twist. One of the streams was transmitted as a thin stream while the others were transmitted around the outside. The data beam was then sent to a receiver and untwisted to recover the data.

E The achievement is very exciting for developers of wireless network technology as the useful spectrum of frequencies is largely used up. The orbital angular momentum model would allow for an infinite number of data transmissions without taking up any more of the spectrum. There is a problem, however: researchers can only transmit the data stream one metre, which is an insignificant distance for communication purposes. The short transmission range is due to turbulence in the atmosphere, which disrupts the signal as the

Chạm để tiếp cận kho tài liệu IELTS miễn phí

light hits air molecules. But the scientists are planning to be able to send the beam considerably further. One idea is to create links every kilometre to extend the network. Another is to build high-speed satellite communication links where the atmospheric problems would not affect the signal. Another possibility is to adapt the technology for fibre-optic use, the way data is currently transmitted over the Internet. Unfortunately, at this point standard fibre-optic cables are not capable of carrying multichannel signals and fibre-optic cables that can carry the signal experience problems of interference between channels as they carry data with high bit-rates,

Nevertheless, exploiting the orbital angular momentum gives scientists options that could lead to significant increases in data transfer; even a modest increase in the existing data transfer rate is worthwhile. Furthermore, very often technology is pulled along by innovative research so a novel solution to carrying the data-rich signal may not be far behind.

Questions 17-22

Reading Passage 2 has six paragraphs, A-F.

Which paragraphs contain the following information?

Write *the correct letter, A-F, next to Questions 17-22.*

17 changing light waves to increase capacity

18 a practical demonstration of the new technology

19 use of the wireless spectrum needing to be monitored closely

20 overcoming the problem of the short range of the new signal

21 improvements in data transmission possibly leading to technological breakthroughs

22 the prospect of saving people a lot of time

Questions 23-27

Complete the summary using the list of words, A-I, below.

Write the correct letter, A-I, in spaces 23-27.

Researchers are looking for a way of using the 23 more efficiently. One option is to transmit signals that are twisted into 24 and wrapping them together, or them. This is still problematic on earth due to 26 but scientists hope that 27 cable technology will catch up with the research breakthrough.

- A bandwidth
- B atmospheric interference
- C fibre-optic
- D light waves
- E multiplexing
- F wireless spectrum
- G spirals
- H data streams
- I novel

Test 4: Reading

READING PASSAGE 3

You should spend about 20 minutes on Questions 28-40, which are based on Reading Passage 3 below.

Sinking Cities

Looking across the Bund towards Pudong across the Huangpu River in Shanghai, you will see an array of modern worldbeating skyscrapers. In contrast, behind you are the magnificent buildings from the nineteenth century, standing on the high tourist promenade that runs the length of the waterfront, you may also notice that the level of the river is quite a bit higher than that of the buildings on the Bund. It isn't because the river has risen higher than usual due to rainfall; no - Shanghai is sinking. It is an unfortunate problem that Shanghai shares with several other major financial and industrial centres and it is caused by factors most of the cities have in common. Included in the list are New York, Bangkok, Houston and Mexico City, all either built on shaky foundations or low-lying land that is now threatened by rising sea levels.

New York and Bangkok are victims of bad luck. The effect of global warming on the sea levels means that these cities may drown in the oceans that brought them such importance and prosperity. Scientists believe that sea levels in the New York area are expected to rise about twice as quickly as in the rest of the world. The position of the city - situated

next to a river, the Chao Phraya, the city is about 50 kilometres north of the Gulf of Thailand. The city is likely to face increasingly severe tropical storms crossing from the Bay as well as threats from coastal erosion and shifting clay soil. It seems unlikely that Bangkok will save itself from drowning under the waters of the Pacific, which are predicted to rise by between 19 and 29 cm by 2050.

Other cities are sinking due to bad planning rather than bad luck. The fourth largest city in America is Houston but it has been built on shaky foundations - and these are now giving way. Houston was literally built on a foundation of sand up to several kilometres deep and loosely packed clay from river deposits formed from the erosion of the Rocky Mountains. In addition to poor foundation materials, Houston has an estimated 300 fault lines running through it. Using GPS data from 24 measuring points throughout the country between 1995 to 2005 a research team were able to monitor the area of subsidence and found an area of Houston measuring 30 kilometres squared was sinking very fast - up to 5 centimetres per year. The reason for the

Chạm để tiếp cận kho tài liệu IELTS miễn phí

where the Hudson River flows into the Atlantic Ocean - already puts America's most densely populated city at a higher risk of flooding. But the impact of tropical storms and rising tides poses more dangers than just flooding. Beaches in the area will be swept away followed by the surrounding wetlands eventually becoming part of the sea; surrounding river estuaries will see an increase in the salt levels in the fresh water. All of this will affect the ecosystems in New York's immediate area and damage developments along the coast. Bangkok too will fall victim to rising sea levels. Also situated on swamplands

subsidence is quite straightforward: the withdrawal of water from deep beneath the surface. Areas of Houston where water extraction has been stopped have stopped sinking. Similarly, parts of Mexico City are subsiding rapidly due to poor foundations - some areas of the city are sinking up to 20 centimetres a year. The city is built on a dry lake bed in the valley of Mexico, and the council has condemned fifty structures since 2006 because of leaning, and approximately 5,000 homes and buildings are unstable. Some of the heaviest buildings, like the Palace of Fine Arts, have sunk more than three metres over the past one hundred

years and its original ground floor is now the basement. Again the reason is the depletion of the water reserve lying under the city. But in this case there is a complicating factor: a vast complex of drains was built under the city to protect it from flooding by water running from the surrounding mountains. As the city sinks, so do the drains and the wastewater they were supposed to carry away is finding its way back to the city. And it's not only water mains and drains that have been affected; as the city sinks the subway network is subsiding with it. Back in Shanghai, the same problem is causing the city of 13 million people and ultra-modern skyline to sink beneath the waterline of the Huang Pu River. Originally a small fishing village built on swamplands surrounding

the mouth of the Yangtze River, Shanghai's population has swollen to around 13 million people. The expansion has been sustained by taking water from wells drilled into the aquifer under the city and by constructing massive skyscrapers. According to China Central Television, Shanghai has sunk up to three metres since the early 1990s mainly due to depletion of underground water but also because of the weight of high-rise buildings situated on areas with soft soil. As a partial solution to the problem, Shanghai is trying to reverse the sinking by pumping 5.2 billion gallons of water a year into the water table with some success - so far the city has risen by almost 11.5 cm.

Questions 28-35

Complete the table below.

Choose **NO MORE THAN THREE WORDS** from the passage for each answer.

Write your answers in spaces 28-35.

City	Situated	Cause of sinking	Effect
New York	where the Hudson meets the Atlantic	the effect of 28.....and rising tides	increased chance of 29.....
Bangkok	on swamps near the Gulf of Thailand	increasingly damaging storms, 30..... and moving soil	a rise in the level of the Pacific of up to 31..... by 2050
Mexico City	on a 32..... that has dried out	using up the 33..... beneath the city	wastewater drains and subway affected
Shanghai	on wetlands around the 34.....of the Yangtze River	wells drilled into aquifer and building 35.....	sunk up to 3 metres

Test 4: Reading

Questions 36–40

Choose the correct letter, A, B, C or D.

36 The thing that may strike you when you are standing on Shanghai's tourist promenade is

- A the contrasting styles of the buildings.
- B its height.
- C that the river is higher than the buildings behind the promenade.
- D that it runs the length of the waterfront.

37 Which of the following is NOT a predicted effect on New York?

- A wetlands becoming part of the ocean
- B beaches being lost
- C developments along the coastline
- D the increasing saltiness of river mouths

38 Houston has been built on

- A shallow sand.
- B material from the Rocky Mountains.
- C volcanic fault lines.
- D accurate GPS measurements.

39 The sinking in Houston

- A affects the whole city equally.
- B is due to water use and the weight of the buildings.
- C has completely stopped.
- D was measured using historical data.

40 Which of the following is NOT true of Mexico City's drains?

- A They were built to defend the city from flooding.

WRITING

WRITING TASK 1

You should spend about 20 minutes on this task.

The tables below show people's reasons for giving up smoking, and when they intend to give up.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

TOP 5 REASONS FOR WANTING TO GIVE UP SMOKING				
Reasons for wanting to give up	Number of cigarettes smoked per day			
	20+	10-19	Fewer than 10	Total
	%	%	%	%
Better for health in general	64	73	74	71
Less risk of getting smoking-related illnesses	27	28	21	25
Present health problems	19	10	10	12
Financial considerations	31	36	25	31
Family pressure	14	13	20	16

WHEN SMOKERS INTEND TO GIVE UP SMOKING				
When	Number of cigarettes smoked per day			
	20+	10-19	Fewer than 10	Total
	%	%	%	%
Within the next month	8	9	21	12
Within the next 6 months	26	32	46	35
Within the next year	22	23	18	21
Total that intend to give up	60	73	79	71

SPEAKING

PART 1: Introduction and interview

Listen to Track 26, pressing pause after each question to answer.

PART 2: Individual long turn

Before you read the task card, listen to Track 27.

Describe a place you would like to live.

You should say:

where this place is

whether you have been there before

what it is like

and explain what it is about this place that you find so appealing.

PART 3: Two-way discussion

Listen to Track 28, pressing pause after each question to answer.

General Training Test A

READING

SECTION 1

Questions 1-13

Read the text below and answer Questions 1-7.

Carnival Event Guide

A

Crazy Colin

Children's Entertainer

will be appearing around the Carnival site 9.00-12.00. Free balloon for children and adults. Try balloon modelling and stilt walking! Colin's assistant Kathy will also be available for face-painting.

B

Punch and Judy Show

The Carnival would like to welcome back Punch and Judy after a three-year absence. Come and see everyone's favourite puppets.

Free entry but please feel free to make a donation.

Shows at 1 p.m., 2.30 p.m. and 3.30 p.m.

C

The Carnival Committee

invite you for tea and coffee at the main tent. Browse our second-hand book stalls and buy some of our beautiful homemade cakes and biscuits.

Open throughout the Carnival: 9.00 a.m.
Close: 4.00 p.m.

50p Entrance Fee

D

Carnival Procession

This year the theme of our procession is 'fashion through the ages'. Watch children and adults from the local community model clothes from different periods throughout history.

The procession sets off from St Bartholomew's Church at 12.30 p.m and arrives at the main Carnival gates at lunchtime (approximately 1.00-1.30 p.m.).

Questions 1-7

Look at the advertisements for events A, B, c and D, on the previous page.

For which event are the following statements true?

Write the correct letter, A, B, c or D, next to Questions 1-7.

NB You may use any letter more than once.

Example

People from the community take part

- 1 Invites people to make a donation
- 2 Charges for the service
- 3 Appears in the morning only
- 4 Is returning to the Carnival after a break
- 5 Offers free gifts
- 6 Appears at the Carnival at lunchtime only
- 7 is available all day

General Training Test A: Reading

Read the text below and answer Questions 8-13.

Dear Sir .

Re: Your Physiotherapy Appointment

Following our telephone conversation, this is to confirm that an appointment has been made for you at our Physiotherapy Unit with Sam :

Major at the following time:

Saturday June 14th 10.30 a.m

Physiotherapy Unit

Stowerbridge Hospital

Lower Lane

Stowerbridge

Please report to the main reception on arrival. If you are unable to attend ! please phone 0543 1146 to arrange a new appointment. Patients who fail j to notify us may be disqualified from further treatment.

You will be required to carry out some light exercise during your treatment. Please wear Loose clothing. You should also avoid eating a ! heavy meal prior to your appointment.

Please bring a list of all current medication when you attend.

On completion of your treatment please report again to reception to ! arrange any future sessions and to be signed out of the Physiotherapy Unit.

Parking is available at the hospital. Charges apply except for patients in receipt of benefits [pension, unemployment etc. To claim free parking please supply relevant documents at the reception desk.

We look forward to seeing you at your appointment.

Questions 8-13

Look at the letter relating to a physiotherapy appointment on the previous page.

Do the following statements agree with the information given in the text? Write

TRUE if the statement agrees with the information
FALSE if the statement contradicts the information
NOT GIVEN if there is no information on this

Example

Answer

The clinic has been in communication with the patient before **TRUE**

- 8 Patients must go to the reception when they arrive.
- 9 Patients may be fined for not keeping an appointment.
- 10 It is possible to arrange an alternative appointment if necessary.
- 11 Patients should bring with them all medicines they are currently taking.
- 12 There is a limit to the number of sessions available.
- 13 All patients must pay for parking.

General Training Test A: Reading

SECTION 2

Questions 14-26

*Read the text below and answer Questions 14-20.***Sports Centre****Terms of membership - Clarendon Engineering employees**

- We offer three Levels of membership to Clarendon Engineering employees - Platinum, Gold and Silver. The level of membership will determine when you are able to use the facilities. Please refer to the brochure available from reception for further details.
- Discounts are only available to those employed with Clarendon Engineering. Applicants must show evidence of their employment with the company.
- Subscriptions must be paid in advance. This can be in full or by monthly direct debit. Please note that membership is for the period of one year. Refunds will only be made under special circumstances. Should you cancel your membership, cards must be returned immediately.
- All new members are required to undertake an induction session during which use of the equipment and facilities is explained. Non-attendance at an induction session will result in you being refused entry to the facilities. The centre reserves the right to withdraw membership from, and take appropriate action against, any person found to have willfully misused the equipment or facilities within the centre.
- Squash and badminton courts must be booked in advance. Bookings can be made up to 7 days in advance by calling 0773 213? or in person at reception. In order to ensure optimum use of our facilities, members must inform the centre if they do not intend to keep an appointment. Failure to notify us can result in staff refusing to make further reservations. The gymnasium and swimming pool can be used without the need to book a session.
- Members will not be given access to the facilities without the presentation of a membership card.
- Please note that we cannot be held responsible for any personal injury you may suffer whilst using our facilities. Should you believe you have an existing medical condition that may be affected by the use of our facilities, we strongly recommend you seek medical advice before using the centre.

A home from home at Melbourne University!

- A. Our relationship with Bechamp Logistics has been a long and fruitful one and we continue to welcome its employees to Melbourne University for an education that is second to none. Whether you are about to start a full-time MBA or joining one of our part-time courses, we look forward to welcoming you to the university. We appreciate how important it is that you quickly and easily find somewhere to live during your time here. This leaflet will outline how we work with you to choose the right accommodation
- B. Obtaining suitable accommodation is a priority for those who are leaving their friends, colleagues and family to spend a period of time away from home. For this reason we promise that all Bechamp Logistics employees who have been accepted on a course with US will receive help with accommodation should they need it.
- C. If you are planning on relocating during your studies or just renting during the week, we recommend you live on campus as experience has shown this will help you settle into your studies more quickly. We have economy single rooms in our halls of residence, or for those looking for a little more luxury we have Soho House, our dedicated hall for company-sponsored students. Should you prefer to live off campus we can offer you a single-room apartment or rooms in a shared house in the city centre or suburbs.
- D. To help you make your choice you will find extensive information on our

website with detailed descriptions of all our accommodation including photos and video tours of rooms and halls. You will also find a full price list for the various accommodation types. For people who are able to visit the university before the application deadline, you are welcome to contact our accommodation office for help with viewing places.

- E. accommodation in any of our dedicated family-friendly halls. There are limited spaces available and you will need to contact us quickly to be sure of obtaining a place on campus. Should these not be available we are always able to help with accommodation off campus.
- F. campus. You should go through the application process as usual and be sure to complete the section marked 'dependents'. This will alert our staff to your requirements so they can prioritise your application.
- G. Once you have been offered a place at the university you are advised to apply for accommodation immediately. All applications are made online. Once we have received your application we will arrange a time for you to be called by our accommodation office where we will talk to you about your options. Following this conversation, we will either reserve your campus accommodation or represent you should you be looking for a place to live off campus in private accommodation. You will receive written confirmation of your residence no later than two weeks before the start of term.
- H. Our accommodation office will be pleased to answer any questions you may have when you arrive at university. Before handing over the keys we ask you to sign a contract outlining your responsibilities. Please note that included in these terms is a commitment to pay for your accommodation for the full academic year.

Please visit the accommodation section of our website for further details

SECTION 3 Questions 27-40

Questions 27-34

The text below has eight paragraphs, A-H.

Choose the correct heading for sections A-H from the list of headings below. Write the correct number, i-x, next to Questions 27-34.

List of Headings

Surprising navigational achievements Inconsistent data Setting up the experiment

- iv The bees in action
- v Theories rejected
- vi Achievements explained
- vii Can larger brained creatures achieve the same?
- viii The challenge for previous researchers
- ix Bees versus computers
- x The bees' natural environment

- 27. Paragraph A
- 28. Paragraph B
- 29. Paragraph C
- 30. Paragraph D
- 31. Paragraph E
- 32. Paragraph F
- 33. Paragraph G
- 34. Paragraph H

Understanding the Flight of the Bumblebee

- A. Bumblebees are remarkable navigators. While their flight paths may look scattered to the casual eye, all that buzzing about is anything but random. Like the travelling salesman in the famous mathematical take the shortest path along multiple stops, bumblebees quickly find efficient routes among flowers. And once they find a good route, they stick to it. The same goes for other animals, from hummingbirds to bats to primates, that depend on patchy resources such as nectar and fruit. Perhaps this is not such a surprising feat for animals with relatively high brain power. But how do bumblebees, with their tiny brains, manage it? As new research in this issue of *PLOS Biology* by Lars Chittka and colleagues shows, a simple strategy may be enough for a real-world solution to this complex problem.
- B. For computers, solving the travelling salesman problem means methodically calculating and comparing the lengths of all possible routes. But such an exhaustive approach isn't feasible in practice, and indeed animals can find a near-optimal foraging route, or trap line, without trying them all. Determining exactly how they do this, however, has been stymied by the difficulties of tracking animals as they forage in the wild. Chittka and colleagues got around this problem by tracking bumblebees (*Bombus terrestris*) on five artificial flowers set in a mown pasture. The "flowers" had landing platforms with drops of sucrose in the middle, and were fitted with motion-triggered webcams.
- C. To keep the bees' focus on the artificial flowers, the experiments were done in October, when natural sources of nectar and pollen were scarce. To make the bees want to find all five flowers, each sucrose drop was only enough to fill one-fifth of a bumblebee's crop. And to keep the bees from finding one foraging site from another visually, the flowers were arranged in a pentagon that was 50 m on each side, which is more than three times farther than bumblebees can see.
- D. The researchers released bees individually from a nest box that was

- about 60 m from the nearest flower, and used the webcams to track the sequence of flower visits during consecutive foraging bouts. The bees found the closest flowers first and added new flowers during subsequent bouts. With experience, they repeated segments of the visitation sequence that shortened the overall route while abandoning those that did not. Trap lines linking all five flowers in a short route were established after an average of 26 foraging bouts, which entailed trying only about 20 of the 120 possible routes.
- E. In addition, the researchers fitted five bees with transponders and tracked them with radar as they developed trap lines. This revealed that flight paths between trap line segments were relatively straight and that, between their first and last bouts, bees cut their total travel distance by 80% (from 1,953 to 458 m). In contrast to computers, bees did not find the absolute shortest route of 312 m even in this simple experimental arrangement. But they came very close, which is remarkable considering that they explored only a small fraction of the possible routes, and established trap lines relatively rapidly. This tradeoff between perfection and speed highlights the differences between mathematical and biological solutions to the travelling salesman problem.
- F. How do bees develop such efficient routes so fast? The researchers assessed three possibilities: that bees optimize foraging routes by visiting flowers in the order of discovery, by shuffling them randomly, or by visiting those that are closest together. But they found that the first two failed to fit their observations while the third did not fully explain them.
- G. Rather, the researchers propose that bees optimize foraging routes by combining exploration with learning from previous bouts, which enables the bees to adjust their routes as they find shorter paths. Based on the bees' movements during trap line establishment, the researchers developed a model linking experience to the likelihood of visiting particular flowers. Bees are well known to be able to compute and memorize distances between locations, and the model assumes that they remember the length of the shortest route so far, compare it to the length of the current route, and then choose the shorter of the two. Over time, choosing the more efficient route favours shorter segments over longer ones. The model is a good fit with the researchers' observations, predicting, for example, that bees will develop and stick to optimal routes in 20-25 bouts.
- H. Besides shedding light on how bees develop trap lines, this work suggests

that small-brained animals can use simple methods to solve complex routing problems without the need for cognitive maps of spatial relationships, as has been suggested. It remains to be seen whether big-brained animals can also develop trap lines with such elementary tools. But if so, that would free up their brain power for other tasks.

General Training Test A: Reading

WRITING

WRITING TASK 1

You should spend about 20 minutes on this task.

A restaurant has placed an advertisement for waiters and waitresses in your local newspaper.

Write a letter to the restaurant, applying for the job. In the letter

- explain what you are currently doing*
- describe your suitability for this area of work*
- say when you can attend an interview.*

Write at least 150 words.

You do NOT need to write any addresses.

Begin your Letter as follows:

Dear Sir or Madam,

WRITING TASK 2

You should spend about 40 minutes on this task.

Write about the following topic:

Many cities around the world have seen an explosion in the number of supermarkets appearing on the high street and in out-of-town shopping centres. This development has led to increased choice for the consumer, ensured prices are kept low and made the shopping experience a lot easier for busy working families.

To what extent do you agree or disagree?

Give reasons for your answer and include any relevant examples from your knowledge or experience.

Write at least 250 words

General Training Test B

READING

SECTION 1

Questions 1-13

Read the text below and answer Questions 1-6.

Manor Road Primary School

Dear Parents

It will soon be Literacy Week here at school and as in previous years we intend to deal with your child's reading and writing skills in the context of a motivational theme. And the theme for this year's literacy week is 'superheroes'!

During the week your child will carry out a variety of tasks to help them develop their reading and writing skills. Children will produce artwork, videos, podcasts, drama performances, pictures, books and DVDs. They will also create imaginative pieces of writing full of interesting characters and plots. We can't wait to see all their work on show in the school reception and main school hall in the coming weeks. There will also be a competition for which prizes will be awarded.

What can you do to help? Please get involved with what your child is doing. At the end of the day ask them what they've been involved in and, if you have the chance, help them with their superhero homework tasks like finding information on the Internet or from books in the library.

Friday 19th October is 'Dressing-Up Day' and your child can come into school dressed as their favourite superhero.

The week will end with parents being invited into the school hall on Friday 19th to view the children's work. Classes end at 3.00 as usual but the school will be open from 2.00 p.m. and parents will be able to take their child home early if they wish.

We look forward to what we think will be a very creative week!

With best regards
Margaret Maclean
Principal

General Training Test B: Reading

Questions 1-6

Look at the letter to parents on the previous page.

Do the following statements agree with the information given in the text? Write

- TRUEif the statement agrees with the in formation
- FALSEif the statement contradicts the information
- NOT GIVENif there is no information on this

Example	Answer
This is the first time the school has had a literacy week	FALSE

- 1 Children will be able to watch films and go to the theatre.
- 2 The school will be putting the children's work on show.
- 3 There will be three prizes for the best work.
- 4 Parents should try not to help their child too much with their homework.
- 5 The children don't have to wear school uniform on the final day.
- 6 Children must stay in school until 3.00 on Friday 19th October.

Support Away Day

Away Day relies on generous donations from sympathetic supporters like you to be able to offer disadvantaged children invaluable experiences and lifelong memories, doing things that that are financially out of the reach of their parents.

Almost £7 out of every £10 we raise comes from the general public so your contributions are essential if we are to be able to continue offering this valued service.

How to donate

Why not set up a direct debit? If you live in the UK you could make a small monthly or annual donation.

If you prefer to make a single donation you can do so using any of the following options:

- Donate by text message - It's free and very easy. Just text AWAYDAY and an amount to 71117111.
- Donate by post - Send a cheque

How can your donation help?

- £ 10 will I pay for the cost of petrol for a trip to London.
- £20 will pay for the cost of a picnic for four children on a day out in the countryside.
- £50 will pay for the hire of eight uniforms for a fancy dress party.
- £100 will pay for the cost of a ticket to the seaside with parents or a guardian.
- £ 150 will pay for a trip to the theatre at Christmas for two families of four with a chance to see the children’s favourite pantomime characters.
- £500 will buy accommodation at Disneyland Paris for two children.

or postal order to the address at the bottom of this leaflet.

- To make a donation over the phone by credit or debit card, please call 03318 463219.

Gift Aid your donation

Add Gift Aid to your donation and help us benefit even more from your generosity. For every £1 you give, we are able to claim 25p more from the government. If you donate by text, watch out for our ‘thank you’ message. We’ll supply a link to a webpage where you can fill in details to allow US to claim Gift Aid.

Read the text below and answer Questions 7–13.

Complete the notes below.

Write **NO MORE THAN THREE WORDS AND/OR A NUMBER** for each answer.

The charity enables children to do things that their parents would have difficulty 7

Donations of 8and 9will enable the charity to organize events for the whole family.

Children can go and watch their 10.....at the theatre.

70% of donations the charity receives come from 11.....

People can make a regular donation by setting up a 12.....

If people Gift Aid their donation the charity can get 13money from the government.

SECTION 2

Questions 14-26

Read the text below and answer Questions 14-20.

Expenses Policy

All candidates invited for interview at Masons Finance are invited to claim back expenses for costs that are, by the HM Revenue and Customs definition, WHOLLY, NECESSARILY AND EXCLUSIVELY incurred during the process of attending the interview.

In general, for candidates travelling from within the UK, expenses covered include those for travel such as mileage or train tickets. Expenses are paid on the basis of the cost of second- class rail travel or 25p per mile for car travel. Mileage will be paid up to but not more than the equivalent cost of second-class rail travel. We request that when travelling by train an off-peak service is used whenever possible. Candidates can also claim taxi fares to and from Shamfield Station to the company head office. In exceptional circumstances the company is prepared to reimburse candidates from the UK requiring hotel accommodation. However, this must be agreed with our HR department first.

For candidates travelling from overseas, subsistence and hotel costs can be reimbursed in addition to travel expenses. Candidates should contact our HR department regarding accommodation as we will pre-book and pay for a room at a local hotel. Please note that the company will not normally reimburse the costs of accommodation that has been booked independently by the candidate. As a general guide, candidates travelling from overseas can claim the cost of an economy airfare. Meals and refreshments consumed during travel can be claimed to a maximum of £20 per day. In exceptional cases we understand that further nights of accommodation might be required for candidates travelling from overseas. In such cases additional expenses may be claimed but only after written agreement has been received from our HR department.

Candidates must retain all receipts and submit these with the expense report we ask you to fill in when making a claim. Please note that the company will not reimburse any costs the candidate incurs in the form of tips paid nor will it pay for fines such as parking tickets or speeding tickets issued during travel.

If you have a question regarding an expense, please contact your interview contact or our HR team.

General Training Test B: Reading
Questions 14-16

Look at the text on the previous page.

Choose THREE letters, A-G.

Which THREE of the following are true?

- A. The company uses an official definition for allowable expenses.
- B. Candidates can claim more than the cost of a second-class ticket if they travel by car.
- C. Candidates should try to avoid travelling at busy times of the day.
- D. The company has special rates with a local taxi firm.
- E. Accommodation expenses for UK candidates are not usually paid.
- F. UK candidates must agree all expenses with HR before travelling.
- G. Candidates must choose a hotel close to the company offices.

Questions 17-20

Choose the correct letter, A, B, c or D.

- 17

Candidates from overseas

A find travel in the UK expensive.

B always need hotel accommodation.

C are allowed to claim for more items than candidates from the UK.

D should contact HR about travel expenses.
- 18

Candidates from overseas can claim for food and drinks

A if they were consumed in a hotel.

B up to the value of £20 in total.

C for more than one day.

D on the outward journey only.
- 19

The company believe that candidates from overseas

A sometimes need accommodation for more than one night.

B should avoid booking additional nights' accommodation.

C may find it difficult to reach agreement for expenses.

D are likely to need accommodation for several nights.

- 20
- When claiming expenses candidates should
- A include any additional expenses such as fines incurred during the trip.
- B notify HR about motoring offences.
- C report to the HR department on arrival.
- D supply evidence of things they have purchased.

General Training Test B: Reading
Questions 21-26

The text below has seven paragraphs, A-G.

Choose the correct heading for sections B-G from the list of headings below.

Write the correct number, i-ix, next to Questions 21-26.

List of Headings

- I. Help improve our working practices
- II. Become an ambassador
- III. How to get involved
- IV. Get to know your colleagues
- V. No need to work up a sweat
- VI. The equipment you need
- VII. Discover our fascinating town
- VIII. A time to suit everyone
- IX. Get back to nature

Example	Answer
Paragraph A	IV

21 Paragraph B

- 22 Paragraph C
- 23 Paragraph D
- 24 Paragraph E
- 25 Paragraph F
- 26 Paragraph G

Join a Workplace Walking Group

- A Several members of staff have been busy planning a series of lunchtime walks that we are sure you and your colleagues will soon become addicted to. Why join? The reasons are endless. You'll get the chance to chat with close friends and colleagues who participate as you would if you were stuck in your office. But what about all those other people you are on nodding terms with but have yet to get into conversation with? A lunchtime walk will be the perfect opportunity to get to know each other better.
- B We rarely get the chance to experience work outside of our own department, which obviously isn't healthy for an organisation like ours. So apart from the pleasure you'll get from talking to new people, these lunchtime walks will also give you the chance to get an insight into how other teams and departments work and share experiences of how teams work together, including situations where problems sometimes arise. This may hopefully lead to better communication and more efficient internal systems.
- c We also appreciate that many of you may want to completely switch off from work during your lunch break so we've tried to organise walks that will appeal to everyone. We are situated close to many historical landmarks and one of our walks takes in several of these sites. We've already had one or two employees with an interest in local history volunteer to act as guides, so now's your chance to discover more about where you work.
- D For those who prefer a gentle stroll through the great outdoors we have countryside walks taking in some of the beautiful lanes and fields at the back of the building. You'll be amazed at how tranquil this area can be - experience some lovely views and the sound of birdsong to help you relax before returning to work fully revitalised after lunch. By the way, these walks take in a stop at the local café for those who'd like to end with a tea or coffee. And there's no need for walking boots as we'll follow landscaped routes.
- E Of course an added benefit is the chance to get away from your desk, clear your head and keep fit. Walking, even at a gentle pace, is regarded as a great way to get into shape and help reduce stress. We also like to think it a pleasurable way

to do this for those who don't like the idea of a gym or an aerobics session.

- F We appreciate that people take their lunch breaks at different times and so have organised a staggered timetable so there will always be a spot at least once a week for everyone. However, please feel free to organise a walk independently if you'd like to make it a daily event.
- G All departmental secretaries and managers have signed up already and will be more than pleased to give you any information you need. We also have a 'walking ambassador' in each department who will be able to answer any questions. See the departmental notice board to check for names or watch out for our next email on the subject. If you're convinced and are ready to sign up see if you can encourage some of your colleagues to join you. The more the merrier!

General Training Test B: Reading

SECTIONS

Questions 27-40

Read the text below and answer Questions 27-40.

The Carvers of Bukittinggi

The world IS becoming increasingly familiar with the products of Indonesia's talented artists. The beautiful batik paintings from Java, the slender wood statues from Bali and the local jewellery from Sulawesi can be found in shops in New York and Paris. Fortunately, the natural wealth and beauty of the area around the Minangkabau town of Bukittmggi allowed both time and inspiration for the development of crafts, especially weaving, silverwork and wood-carving. Although the wood-carvers of the Minangkabau may not be as well-known as some other Indonesian artisans, their strong sense of tradition and of dedication to detail makes for a fascinating story.

Nestled in a high valley between the two volcanic mountains of Merapi and Singgalang is the small village of Panda! Sikek, better known as the "Wood Carving Village." The village is south of Bukittinggi, the cultural centre of the Minangkabau, and east of Padang, the capital of west Sumatra. The terraced rice fields, lush tropical vegetation, cool breezes and abundant water of the Anai Valley have made it an ideal spot for creativity and an inspiration for centuries of wood-carvers The neighbouring forest provides an abundance of the wood called suriyan, a hard but workable medium for the carvers. Today, more than one hundred carvers claim Pandai Sikek as their home, though only a few can be found at work in the village. Many are away on contract assignments in Malaysia and in major Indonesian cities.

In the village, carvers knee-deep in wood shavings work in little huts along the roadside. Many have two or three apprentices carving repetitive patterns on small items to supplement their incomes. Cigarette boxes, jewellery boxes, ashtrays, bookholders - all can be purchased for sums that seem very modest in relation to the skill involved in making them. Most large items, such as chairs, tables and bed frames, are done on a custom-order basis, and all the shops were busy filling orders, evidence of both the continual need for their craft and the appreciation of their handiwork.....

(Coming soon....!)

Questions 27-32

Look at the article on the previous pages.

Do the following statements agree with the information given in the text? Write

- TRUEif the statement agrees with the information
- FALSEif the statement contradicts the information
- NOT GIVENif there is no information on this

- 27 Indonesia is famous for its wood-carvers.
- 28 Wood is hard to find near the village.
- 29 The majority of the wood-carvers work away from their village.
- 30 It is difficult to become an apprentice.
- 31 Smaller items are cheap in relation to the skill involved in making them.
- 32 Craftsmen make some items to suit the requirements of customers.

General Training Test B: Reading
Questions 33–36

Complete the notes below.
Write **NO MORE THAN THREE WORDS** for each answer.

The Handicraft Centre also functions as a training centre for aspiring
33.....
Students are given feedback on their work by 34.....
Pandai Sikek gets its name from the word 'clever' and the name of a
35..... Working on an exact copy of a royal palace enabled Fauzi to learn
a number of the
36used by carvers in the past.

Questions 37–40

Choose the correct letter, **A, B, C or D**.

- 37 Wood carvings
A were originally found all over the Anai Valley.
B are based on images found on ancient stone carvings.
C are made out of respect for local spirits.
D are the same as those found on stone carvings.
- 38 Designs featuring local plants and wildlife
A appear in carvings created by several generations of craftsmen.
B have less symbolic significance than in the past.
C are interpreted in unusual ways by the wood-carvers.
D are painted by local artists.
- 39 The carvings in the houses
A are copies of designs that originally appeared on boats.
B feature leaders of the community.
C are in the form of wall panels.
D are made from recycled panels from old boats.
- 40 The fern and sirih leaves
A represent particular qualities.

- B are painted in different colours.
- C are worn by men who feature in the carvings.
- D only serve a decorative purpose.

WRITING

WRITING TASK 1

You should spend about 20 minutes on this task.

You recently spent a night in a hotel and had to put up with a great deal of noise very early in the morning because of a faulty central heating system. The manager promised to contact you regarding compensation but you still haven't heard from him.

Write a letter to the hotel. In the letter

- describe the problem at the hotel*
- explain what the manager had said at the time*
- say what you want the manager to do.*

Write at least 150 words.
You do NOT need to write any addresses.
Begin your letter as follows:

Dear Sir,

WRITING TASK 2

You should spend about 40 minutes on this task.
Write about the following topic:

What distinguishes young people from their parents' or grandparents' generation is a lack of physical exercise. Today's generation are spending far too long playing computer games, chatting aimlessly on social networking sites or simply watching TV, and too little time being active.

To what extent do you agree or disagree?

Give reasons for your answer and include any relevant examples from your knowledge or experience.
Write at Least 250 words.

Audio script

Track 01

TEST 1 LISTENING SECTION 1

Operator: Good morning. Z-Mobile Services. This is Tess speaking. How can I help?

Caller: I want to report a stolen mobile phone.

Operator: Could you confirm your postcode please sir?

Caller: It's CN2 1EB.

Operator: Thanks. And your house number?

Caller: 34.

Operator: Okay. Can you give me the telephone number of the phone that was

stolen?

Caller: Yes, it's ... wait a minute ... it's 07090 ...

Operator: 07890...

Caller: 623 ...

Operator: 623 ...

Caller: 570

Operator: 570. Okay. So, it's 07890 623570.

Caller: Yes, that's right.

Operator: Can you just confirm your name?

Caller: Yes, it's Tomas Green.

Operator: Is that Thomas spelt T-H-O-M-A-S?

Caller: No, there's no h'. It's just Tomas. T-O-M-A-S.

Operator: Okay. So you said your phone was stolen?

Caller: Yes.

Operator: That's right. I reported it to the police this morning.

Caller: That's good. I'll need to take down your crime reference number.

Operator: I've got it here. It's C2 ...

Caller: CZ ...

Operator: Dash 17624 ...

Caller: 17624...

Operator: Dash 5.

Caller: 5. Thank you. Let me run through that again, CZ dash 17624 dash 5.

Operator: That's it.

Caller: Just a few more details. Can I have your IMEI number?

Operator: Oh, what's that?

Operator: It's the International Mobile Equipment Identity number. It's a—
 Sorry, I don't have it.

Caller: That's easy. Between 1 and 2 o'clock yesterday.

Operator: That's 1 to 2pm on 16th August. Thank you. Now, I just need a few details of the incident if you wouldn't mind

Caller: Sure. I was in the Bangs Coffee Bar in the city centre. I definitely had my phone with me when I sat down. In fact I remember checking to see if I had any text messages. But when I came to leave it wasn't on the table.

Operator: Did you leave the phone unattended at any time, perhaps to go to the

Caller: No, that's the funny thing. Like I told the police, it was very busy in there because it was lunchtime and all the tables and chairs were pushed really close together. There were a couple of other people at my table. Someone must have leaned across when I wasn't looking and slipped my phone into their pocket.

Operator: Oh dear.

Caller: I know. It's such a pain. I suppose I'll have to pay for a replacement?

Tracks 01-02

Operator: Fortunately you're covered by our 12-month Care Plan so there won't be a charge for replacing it this time. But I have to tell you if it happens again within the next three months you may have to pay a fee.

Caller: Fair enough. How soon can you send me a new one?

Operator: We've got two options. You can get it sent by courier for next-day delivery for a small fee or we can send it in the standard post free of charge. You should allow about five days for it to arrive.

Caller: That's a bit difficult. I'm going back to Australia the day after tomorrow to see my parents for a month. Any chance you could send it to their address?

Operator: No, I'm sorry. We can only send replacements to UK addresses.

Caller: In that case I'd better have next-day delivery then,

Operator: Okay, so just to confirm the delivery address ... Is it 34 Solent Gardens?

Caller: That's it.

Operator: The final thing we need to do is to put a block on your phone.

Caller: You mean to stop the thief from using it? I was wondering about that.

Operator: What I need to do is put your IMEI number into the Central Register, which will essentially prevent anyone else from making calls from your phone. Now the IMEI number is a 15-digit number that you can see underneath the phone's battery. Do you have a record of it?

Caller: No, sorry. Is there any other way to find the number?

Operator: Yes. We usually trace it from a call you've recently made. In a moment I'll put you through to my colleague who deals with that. By the time you've finished with him your mobile will no longer operate.

Caller: Good.

Operator: And with your new phone I'll also send you a Crime Prevention leaflet, which will give you some tips on how to protect your phone from being stolen again.

Caller: Thanks, you've been really helpful.

Operator: Don't mention it. Just putting you through to my colleague now ...

Track 02

TEST 1 LISTENING SECTION 2

Hi. you're listening to Marc Ambrose and I'll be with you through to midday on Talk Back, the show where you tell us what you think about Radio Western. I'm sure you've all heard we have a new boss here at Radio Western and she's very keen to get your feedback. Well, you've certainly taken her invitation seriously. We'll be dipping into the postbag for your feedback in just a moment and speaking to a surprise guest or two later in the show.

I must start by saying a big 'thank you' to Tony Marsons - judging by your letters, he did a great job of covering the show last week whilst I was away. Thanks Tony, if you're listening. And thanks for all the emails asking about my holiday. I had a long, rather boring flight home late last night but I must say I had a wonderful time, The food was absolutely delicious and the locals we spoke to were really friendly. Shame about the weather, which was an absolute washout, but you can't have everything I suppose. And the kids loved it, so everyone was happy.

Anyway, on to the first of your letters ... Sally from Liverpool is very concerned about the consequences of the cutbacks we've been experiencing here at Radio Western, in particular whether some of our late-night music shows could be facing the axe. 'We're force-fed a great deal of pop music throughout the day,' writes Sally, 'and some of your listeners look forward to the more niche musical genres you cover in the evening. Are these in danger when you rearrange the schedule?' Not at all Sally. In fact look out for one or two exciting new shows over the coming weeks. We've got a brand new classical music show coming soon and the return of the ever-popular Chris Greene with his show on international folk music. And of course there's Carol Whittaker's History of Jazz every Friday night. Hopefully this will put your mind at rest. Sally.

John from Leicester writes in to point out that many of our guests on Talk Back and other shows seem to run out of time before they have the chance to finish the interview. 'It happens again and again,' writes John. As the programmes draw to a close guests get rushed and many questions go unanswered. Why don't you offer some - and of after-show online channel where the guest can continue answering listeners questions? I think that's a great idea John. And as you go on to say, if it were recorded, people who don't get the chance to hear the live show could catch up later. We'll certainly pass this one up to management. I'm sure a service like this would go down really well on our website.

Now Clive has a question that will be of interest to all US over-50s fans of Radio

Western. Clive wants to know why we don't feature more issues related to this age group and cater more to this group's taste in music. As Clive explains, 'As a regular listener I'm concerned about your age profiling Presenters seem intent on covering topics that appeal very much to the 30-somethings, which is great for them, but what about people of other ages?' Clive would like to see music shows aimed at the older generation and more on problems facing the over-5Ds in our consumer affairs shows. Well Clive, we'd certainly hate to think you're feeling excluded from our schedule. What about other listeners? Do you think we're getting it about right or is there room for improvement?

Tracks 03-04

Track 03

TEST 1 LISTENING SECTION 3

Simon:

Hi Kelly. How are you?

Kelly:

Fine thanks. Do you still have time to talk about our presentation?

Simon:

Yeah, for sure. We need to get going on this, don't we?

Kelly:

Well, it's next Wednesday, so yes.

Simon:

I thought it was Thursday.

Kelly:

No that's the other group. We're doing ours the day before. I've just seen Fiona. She's going to be a bit late so shall we just get started?

Simon:

Yes, fine. We're definitely doing it on women in *education*, *aren't we?* *I know* we talked about women in politics but are we going for education?

Kelly:

Yes, that's right. Now it's not too long is it, the presentation? They said to keep it to about half an hour. Maybe we can sort out who's doing what today.

Simon:

Yes, good idea. One thing we do need to sort out is a projector and laptop. We're going to use PowerPoint or something like that for the talk, aren't we?

Kelly:

Yes. They said we could book a projector and laptop from technical services if we needed them. Because it's not in the lecture theatre, is it? I know there's already one set up in there but...

Simon:

No, the lecture theatre was booked. We're in the seminar room.

Kelly:

Okay. So what's the next step? We need to work out who's doing

- what, don't we?

Simon:

Well, we all know the subject, seeing as our last essay was on this topic.
- Kelly:

Yes, but we can't just stand up and ramble on; it'll need to be structured. I've got an idea Fiona's essay was brilliant, wasn't it? Why don't we base the talk on that? We can always add bits here and there if we think it needs padding out anywhere.
- Simon:

That's a good idea. Shall we ask her to get a copy of it for both of US?
- Kelly:

Yes, I'm sure she won't mind. We can always let everyone know at the start of the presentation that it's Fiona s work. But we don't want to just read it out. That'll be really boring. It's probably best to make notes from it so that we can improvise a bit on the day.
- Simon:

Why don't we break the essay down into sections and the three of US can each take on one section. We can all make notes on our own part and add to it where we think it needs it. That way we can try to make it our own.
- Kelly:

Yes, I like it. So let's ask Fiona to start the talk off and bring it to a close. She can take on the introduction and conclusion. I know she divided the essay into the situation for woman in the past and then compared it to how things are now. So why don't i take the bit on the past and you talk about the situation for women as it is now?
- Simon:

Okay. If we give ourselves till the weekend to work on it we can get together on Saturday to see how it's looking. Now what about the presentation itself? Someone will need to build that and find images. We don't just want to fill each slide with a load of text, do we?
- Kelly:

No we don't. Before I forget, I can sort out the Laptop and projector. I've got to go down to technical services to get them to have a look at my laptop. They reckon they can get it to run a bit faster. But the presentation ... who's good with computers? Do you fancy having a go?
- Simon:

I don't mind. But I'll wait until we've met up on Saturday just to make sure we've all got our notes.
- Kelly:

We'll need images, won't we? Shall we all search for our own to fit

our section of the talk?

Simon: Yes, and then if you and Fiona email them to me I'll add them to the presentation.

Kelly: Right, that was easy wasn't it? And look, here comes Fiona. Lets ask her about her essay.

Track 04

TEST 1 LISTENING SECTION 4

Tanya: Hi everyone. Today Mark has come in to talk to you about time management strategies. If you remember, in the introductory session I told you the difference it can make to your studies so this is an incredibly important session. Thanks Mark.

Mark: Hello. Yes, I'm Mark. I lecture over in the Business School but I have a bit of a reputation for being rather evangelical about time management and I'm often invited in to other courses to talk about it. So here I am!

You've now come to the end of your first week at university and you've probably noticed how different it is from school or college. For some people this step up comes very naturally but, in our experience, many students find this new regime a challenge. People aren't watching over you anywhere near as much and you're expected to be far more responsible for your own learning. Research I've carried out shows that 65% of male students have poor time management skills. It's not quite so high for females but still a majority of 55% would benefit from developing these skills. Students who don't will see their grades and general progress suffer as deadlines are missed or work gets rushed, with a decline in the quality of work as a result.

In a nutshell, you need to be aware of the big picture, to know what's coming down the line at any given time and what needs prioritising. Start by creating that big picture, using our yearly academic planner. And don't hide it away in a drawer somewhere. Give it pride of place somewhere like on the bedroom wall so you'll have daily reminders of what's approaching. During this first week you'll have been given seminar and lecture times, essay deadlines, exams dates and so on. Add these dates to your planner and add any new deadlines such as seminar presentations or tutorial dates as you

get them. Those important non-academic occasions shouldn't be ignored either. Trips back home for family celebrations need to be factored in.

Looking at your planner, the first thing that will strike you is how much time you have on your hands. Just a few seminars here and there, a couple of lectures on Tuesday and Thursday. Easy, you think. But this is very misleading indeed. Your planner only looks empty because it doesn't show all that essential self-study you'll need to do. And as there's no-one else structuring this time for you you'll need to manage this yourself. You don't want to waste those hours between lectures or seminars in the café. Use this time to read through your lecture notes, prepare for the next seminar or do some research for that next assignment. Essentially, structure your days on a 9-5 basis as if you were a full-time employee and start to calculate how you're going to fill those gaps efficiently.

Start by considering how you're going to meet all these deadlines. If there are any cooks amongst you you'll know that putting a nice meal on the table requires more than just... well, cooking. You need to research the ingredients, buy them, chop, slice, mix and so on. Cooking itself is a long way into the process. It's the same with that essay you have to write or that presentation you might have to make. They need careful planning beforehand and that time needs to be built into your preparation, start prioritising what needs doing and when. Download our monthly and weekly planners to help you map it all out.

And here's an important point: when you're planning what to do, be task-orientated rather than time-orientated and set achievable goals. 'Finding images for a presentation' for example, is measurable. Simply writing research 10 a.m.-11 a.m.' isn't. This task-orientated approach will be immensely helpful, forcing you to break your preparation down into individual, achievable steps.

Try to assess when busy periods are likely to occur such as the week leading up to an assignment deadline. Are there any evenings during the week you could put aside for extra work? And, just as importantly, make a note of any times you won't want to be working. You'll need time for you, sessions in the gym. evenings when your favourite programmes are on TV. Don't forget to schedule in time for

non-academic activities like going shopping or doing the laundry. It's best to have a fixed time each week for jobs like these so they don't interfere with your academic work.

Finally, decide where you're going to do your self-study. Will you be distracted by the TV, the Internet or friends if you stay in your room? Perhaps the library will be a better place. Anywhere that encourages you to prevaricate should be avoided at all costs.

Starting with the big picture and then working towards individual goals will leave you feeling in control rather than being pulled here and there, firefighting as the next deadline looms ...

Tracks 05-10

Track 05

TEST 1 SPEAKING PART 1

in this first part of the exam I'd like to ask you some general questions about yourself.

Where do you live?

Is it a nice place to live?

Do you have many tourists visit your area?

Let's talk about your interests. Do you have any hobbies or interests?

Have you seen a good film recently?

How often do you go out with friends?

Track 06

TEST 1 SPEAKING PART 2

I'm going to give you a topic and I'd like you to talk about it for one to two minutes. Before you talk, you have one minute to think about what you are going to say. You can make some notes if you wish. Here is your topic.

Track 07

TEST 1 SPEAKING PART 3

We've been talking about the subject of fame and celebrity, I'd like to discuss this subject with you with some more questions.

Do you think being famous is a worthwhile ambition?

Who are currently some of the biggest celebrities in your country?

Do celebrities deserve the attention they get from the media?

Does fame generally bring happiness to the individual?

Do well-known people suffer a loss of personal privacy?

If you could be famous for doing something, what would it be?

Track 08

TEST 2 LISTENING SECTION 1

- Seb:

Hi Lydia. How was your French class?
- Lydia:

I enjoyed it. Francoise, the teacher, she's really nice and friendly. What about you? You're in the exam class, aren't you?
- Seb:

Yes. It was good. There's a lot of work but I think I'm going to enjoy it. Anyway, we were going to meet up later, weren't we? To see what the city centre's like. Do you still want to go?
- Lydia:

Definitely, yes. Some of the people in my class went out last night and had a great time. Where would you like to go? What would you like to do?
- Seb:

I'm not that bothered really. We could walk around for a while, do some window shopping, see some local sights. I wouldn't mind seeing a film later in the evening if you'd like to. My host family are cooking so I don't think I'll be hungry for a meal or anything like that. I don't really want to stay out too late, no clubs or anything. What about you?
- Lydia:

Let's just see how we feel when we get there, shall we? My teacher told me it's late night shopping so there should be lots to do. Shall I meet you after school?
- Seb:

Well, I need to go back to my host family first. As I said, they're cooking me a meal and it'll be a chance to meet all their family. Shall I come to your house when I've finished. You're with a host family as well, aren't you?
- Lydia:

Yes, I haven't memorised the address yet... Wait a minute ... Where's that card they gave me earlier? ... Here it IS. Have you got a pen?
- Seb:

Hang on Right ... yes, what is it?
- Lydia:

Okay, it's Mr and Mrs Andrews ... You don't need that, do you? Here we are ... the address, it's 60 Mayweather Road. It's in Coldfield, not far from the city centre actually. My house is on the 14 bus route. It's easy to find: it's just across the road from the police station. If you get lost, here's the telephone number ... 01764 38864. Shall we say about 6.00?
- Seb:

Okay, that'll give me time to get ready.
- Lydia:

I'd like to find somewhere that sells paper and pens if possible.
- Seb:

I'm sure you'll find somewhere. I'm hoping there's a bookshop. The

teacher has recommended a good grammar practice book for the course.

Lydia: If we've got time I could use this voucher the school gave us for a free coffee in the library café.

Seb: Oh yes, I've got one of them too. Good idea.

Track 09

TEST 2 LISTENING SECTION 2

Tutor: OK, so here were are on the first floor. The self-access centre is just along here on the left. This room's very popular with students and can get quite busy. When it's quiet you can come here as often as you want but if there's a lot of demand, such as coming up to exam time, we have to limit sessions to make sure everyone gets a chance to use the resources.

If you'd like to follow me in. So, here we are. As you can see, it's a lovely bright room with lots of resources to help you with your English studies. Over there against the wall we have a row of Internet-connected computers. As you can imagine these get taken very quickly with students wanting to check their email, Facebook, that kind of thing. Because of the demand we ask students to try and stick to about 30 minutes maximum.

You'll need to log in with your username and password. You should have created these already during your induction, Please do not share your details with anyone else and please make sure you read our policy on using the Internet.

I mentioned the help desk earlier and that's it over there just past the computers in the corner. There are usually two members of staff available to help you and these will often be teachers so if you have any language questions that's where you can go.

Now, over there you can see the reference section. You'll find dictionaries, exam practice tests, vocabulary and grammar books. I should point out that these books are for reference only and we don't offer a loan service. We are allowed to make photocopies of one or two

pages so if there's an exercise you need a copy of ask the staff to help.

Now these computers on the oval table here, they're our high-spec PCs. You'll find programmes to help you with your English but also opportunities to practise other languages such as Spanish, Chinese, German; several languages in fact. Some of them require a CD-ROM ... You can collect them from the help desk. By the way, there's no Internet connection on these computers nor any office software for the time being. If you want to do any word processing you'll need to use one of the laptops we keep for this purpose. Again, see the staff if you need one of these.

Some of you were asking earlier about extra listening practice and these small rooms here are dedicated language labs. If you want to use this resource see a member of staff to buy a set of headphones. And finally here on the left we have two stands with our large collection of readers. These are simplified novels by well-known British authors like Charlotte Bronte, Charles Dickens and Shakespeare. The books are graded and you'll find lots that will be appropriate to your level. Unlike the reference books you can take these readers home and keep them for up to 14 days.

I think that's everything. The centre is open from 8.30 till 5.30 during the week so, as your classes start at 9.00, those of you who get here early can use the resource before your lesson. Although it's open all day long, it's booked by a tutor for their class now and again so you might not be able to gain access if you have any free time during the day. It's best to ask the tutor concerned if it's okay to pop in. Oh, and it's open on Saturday as well, just for a few hours, from 10.00 till 1.00.

Track 10

TEST 2 LISTENING SECTION 3

Tutor: Hello Jacob. Come in and take a seat, How are you finding the course?

Jacob: Very good. I'm really enjoying myself.

Tutor: Good. Well, I've had a look at the first draft of your assignment and it shows a great deal of promise. How well do you think you answered the question?

Jacob: I think I dealt with the task okay. I spent hours in the library reading up on the subject so I feel confident I answered the question. I'm not sure

about my Spanish though.

Tutor:

Well, for a first draft I was very happy with the content... You've included all the important points and you've given a very balanced argument so I'm pleased with that. I think one area you need to work on is organisation.

Jacob:

Yes, my other tutor said the same thing about another piece of writing. My ideas weren't organized logically, she said.

Tutor:

Well, to be fair. I think the order of your ideas here is fine. It's your paragraphing that's the problem. If you look at this page it's difficult to actually see your organisation. Your ideas are in the right order... but I can't make the organisation out very well because there aren't any paragraphs.

Jacob:

Yes. I see what you mean. Perhaps if I left a line between paragraphs it would make it clearer.

Tutor:

Yes, that's an excellent idea. Have a look at paragraphs in books, magazines, newspapers ... that kind of thing. There's no need to read everything ... Just pay attention to how paragraphs are presented.

Jacob:

Okay. I'll have a look at some of my friends' work as well. They don't seem to have this problem. What about the style of the writing? Is that okay? I've never really learnt how to write formally so I'm always a bit worried about this when I write an essay.

Tutor:

The register is very good Jacob, no problem at all. You've used lots of nice set expressions we'd expect to find in a piece of writing like this and used them very naturally.

Jacob:

That's good. What about my Spanish?

Tutor:

Your basic grammar is okay; you haven't made many mistakes so that's good. What I would suggest is trying to experiment more with advanced sentence structures. Yours tend to be on the short side. That's okay when short sentences are required but sometimes combining two sentences into one can make the essay flow more naturally,

Jacob:

Have you got anything I can use to practise that? Any books or websites I could visit?

Tutor:

Yes, no problem. I'll give you one of our worksheets in a minute. You can take it away and work on it before you write your second draft. Finally, another thing you could think about is using more advanced vocabulary. Again, the words you've used are fine but there are more advanced

synonyms that would fit more appropriately in an essay like this.

Jacob: Well I've bought a thesaurus.

Tutor: Yes, that's just what you need. As you can see, I've underlined where I think you could make changes but I haven't suggested any synonyms. Use your thesaurus to try and find some alternatives ...

Track 11

TEST 2 LISTENING SECTION 4

Good morning. I'm here today to talk about the placement that's offered to all Psychology students. As you all know this takes place in the third year of the Psychology BSc. I'm here to explain a little about the placement and how the process works. A lot of preparation's involved in getting these placements right so you need to be thinking about this now.

Students taking up a placement year benefit immensely from the experience. To find decent employment *in* the field of psychology the chances are you'll need to undertake some form of postgraduate training such as one of our Master s courses. These courses invariably demand experience in the field you intend to study so being able to gain this experience during your undergraduate degree is a great advantage.

There's a lot to be gained from joining the scheme. Of course it will help you identify the areas of psychology you may ar may not be interested in. And you'd develop transferable skills such as problem solving, team working, communication skills - skills that employers demand and that graduates often lack. Also remember that the placement will offer you networking opportunities to become acquainted with key players in your field.

Many of our students who've completed a placement year take up a position with the same employer after graduation or after successfully completing postgraduate training. In fact many of our students from previous years now hold influential positions in the police, the health service and the private sector as a direct result of their placements.

The placement you choose will depend very much on your own area of interest. Those of you who have a particular interest in research can opt for a placement in a hospital unit here or abroad, working in areas of forensic and clinical psychology. A post here can be very rewarding and allows you to contribute to qualitative and quantitative research data and learn practical research skills you can use in your coursework.

For those who prefer hands-on experience of working with patients there are a wide range of options available.

We have links with several charitable and public-sector organisations that support

stroke patients and people recovering from serious physical trauma, for example due to motoring or industrial accidents. You will have the opportunity to help them deal with long-term clinical treatment and pain management.

There are several opportunities to work with addiction and rehabilitation units. The kind of experience you'll gain here can be very wide-ranging, for example offering you the chance to observe group therapy and one-to-one counseling sessions for anxiety and anger management classes. Students are encouraged to give their reaction to sessions during regular team meetings, which can often be of benefit to both the student and the organisation.

For those of you interested in the application of psychology in education, we have a number of students who take placements working with children with special educational needs. Students in the past have worked as teaching assistants and contributed to teacher-training workshops.

There's a lot more information about this on the website including case studies written by some of our previous students. These will give you a much Wider and richer picture of our placements.

As I said earlier, you should already be giving this some serious thought. Our placement tutor, Greg Smith, will be able to advise you about the organisations we have contacts with and we've worked with in the past. Once you've discussed the opportunities available we ask you to contact the organisation concerned to investigate potential positions and to arrange an interview. Your personal tutor will be able to help you with updating your cv and interview skills.

During the enrolment process you'll have been notified of the need to obtain a CRB check. In cases where you're working with vulnerable people it's a legal requirement that you've had a Criminal Records Bureau check carried out. without this we won't be able to approve the placement. If you haven't yet arranged this you must notify the placement officer of this during your first meeting. He'll give you the necessary paperwork to make your application. Once you have the certificate, please supply a photocopy to the placement officer.

Track 12

TEST 2 SPEAKING PART 1

In this first part of the exam I'd like to ask you some general questions about yourself.

How long have you been studying English?

Do you enjoy learning another language?

What subjects do / did you enjoy studying at school?
 Let's talk about travel. Have you been on holiday recently?
 What is your favourite form of transport?
 Where would you like to spend a two-week holiday if you could go anywhere?

Track 13
 TEST 2 SPEAKING PART 2

I'm going to give you a topic and I'd like you to talk about it for one to two minutes. Before you talk, you have one minute to think about what you are going to say. You can make some notes if you wish. Here is your topic.

Track 14
 TEST 2 SPEAKING PART 3

We've been talking about the subject of hobbies and interests. I'd like to discuss this subject with you with some more questions.
 What are the benefits of having a hobby or an interest?
 Do hobbies change from generation to generation?
 In what ways can hobbies or interests bring people together?
 Are there any hobbies that can lead to work in the same area?
 Has the use of technology in the home led to a decline in hobbies?
 Are some people put off taking up some hobbies because of the cost involved?

Track 15
 TEST 3 LISTENING SECTION 1

Debbie: Good afternoon. Hartline Car Insurance How can I help you?
 Liam: Hello. I'd like to speak to someone about car insurance.
 Debbie: Certainly sir. Can I take your name please?
 Liam: It's Liam. Liam Byrd.
 Debbie: Okay Mr Byrd. Is the policy for you?
 Liam: Yes, I bought the car last night. It's still with the original owner though ... until I get the insurance sorted out. Will I be able to do this over the phone now?
 Debbie: Of course sir. If you have all the information we need to process the application, we should be able to sort it out for you immediately. Could you tell me the make and model Mr Byrd.
 Liam: Yes, it's a Ford Fiesta.
 Debbie: And can I have the registration number please?
 Liam: Yes, it's 3R1JTW.

Debbie:

Okay ... I can see it's a 2002 model, is that right?

Liam:

That's right, yes.

Debbie:

And what's the current mileage Mr Byrd?

Liam:

Very high unfortunately! 90,000 miles.

Debbie:

Okay It 5 obviously very reliable!

Liam:

Hopefully, yes.

Debbie:

And how many miles will you be driving per year?

Liam:

Erm, probably about 6.000 a year.

Debbie:

Okay. And where will the car be kept overnight?

Liam:

Well. I don't have a garage or a driveway so it'll be on the road.

Debbie:

Okay, nearly there. When would you like the policy to be effective from?
Immediately I suppose?

Liam:

Yes. I'm hoping to drive the car home this evening so could I be covered from today?

Debbie:

Yes, that's fine. Now, do you want fully comprehensive cover or
third party fire and theft?

Liam:

Just third party fire and theft. It's only an old car.

Debbie:

And how much no claims bonus have you got, sir?

Liam:

6 years.

Debbie:

Okay. Have you decided to take up any of our additional cover options?
We have legal cover, for a small fee each month. And we can offer a very competitive rate for driver injury insurance or

Liam:

No, no thanks ... Sorry but I've already looked through what's available on your website and how much it all costs. I've got breakdown cover with another company and the car comes with a spare set of keys so I should be okay there. I'd like to take out the 14-day courtesy car though, and keep my no claims bonus ... so I'll protect that and I'd like to have the windscreen cover as well.

Debbie:

Okay Mr Byrd. So that's third party fire and theft, with additional cover for a courtesy car, protected no claims bonus and windscreen cover. That comes to £425. We ll need to see proof of your no claims bonus. Can you send this to US?

Liam:

Yes, no problem at all.

Debbie:

Okay. I just need your payment details and I can process this for you.
So can I have your full name please?

Liam:

It's Liam Byrd. That's B-Y-R-D.

Debbie:

And your address?

Liam: 35 Bottiville Crescent, Birmingham, B56 1ED.

Debbie: And your date of birth?

Liam: The 11th of November 1969.

Debbie: And your telephone number Mr Byrd?

Liam: 0121 677 9887.

Debbie: How will you be paying Mr Byrd? By credit card?

Liam: By debit card if that's OK

Debbie: Yes, that's fine. What kind of card is it?

Liam: It's a Visa card.

Debbie: Okay. Can you give me the full number that runs across the centre of the card?

Liam: Yes. it's 2337 4006 2005 1551,

Debbie: And the three-digit security number on the reverse of the card?

Liam: Okay ... hang on ... Yes, it's 426.

Debbie: Thank you. Finally, can I just ask how you got to hear about our company?

Liam: Yes, sure. I found you on the Internet.

Debbie: Thanks. Okay, your payment has been processed successfully. You're now covered Mr Byrd. Would you like US to send your documents to you or are you happy to download them from the website?

Liam: Would you mind posting them to me please? I'd like a paper copy and my printer's not working.

Debbie: No problem Mr Byrd.

Tracks 16-17

Track 16

TEST 3 LISTENING SECTION 2

Presenter: Welcome back to B.U.R.S., your independent student union radio station. We're looking at some of the incredible feats one or two of you have been up to during your summer break. I'm with Katherine who's going to tell US about her successful climb of one of the most iconic mountains in the world - Mont Blanc. Katherine, tell US a little about your achievement.

Katherine: Well, actually it was the second time I've reached the summit - the first was in 2007, the year before I came to university. People are often surprised to hear how popular the mountain is with climbers - I've read somewhere over 30,000 people attempt the climb each year and

around 200 people a day summit during the summer season so it's very crowded up there. Unfortunately it's also potentially very dangerous. In July 2007, the month before I did my first climb, the death toll reached 30, mainly due to bad weather conditions. The sheer number of people can cause falling rocks, which only adds to the danger.

Presenter: So why did you do the same climb twice? And was it easier the second time around?

Katherine: In many ways they were totally different experiences. The first time I went as part of an organized group. There were about 20 of us and we took four days to summit. It was much more of a sociable experience compared to the second climb. This year I decided to go solo with just one overnight stop. I felt more confident having already summited once and I wanted to face the challenge of being in control. Actually, you're never really alone - there are other climbers and groups around all the time but I suppose being alone made me feel more intrepid. The first climb was quite difficult as the weather was very changeable and we found ourselves climbing in very cold, windy conditions. We were in a group so we offered each other encouragement but it was still very difficult. The weather this time was wonderful. Plus I also spent a few days beforehand in Chamonix and acclimatised myself more to the altitude - this certainly made it easier. You can achieve the same thing by climbing some of the smaller peaks in the area first but I wanted a more leisurely start. It was fantastic. I thoroughly enjoyed it.

Presenter: Did your experiences on the first climb help you the second time around? I 'm wondering if you have any useful advice for others planning on doing something similar.

Katherine: Well, because the climb's becoming so popular I think people don't always give it the respect it deserves. And I 'm not talking here about the physical condition you need to be in to take on a challenge like this or having the right equipment. That goes without saying. I think what took me by surprise more than anything else was the extreme weather conditions, even in the summer. For those who want to summit in a single day or two the climb will often start early in the morning so you'll need to make sure you're wearing enough layers to protect yourself from the cold and wind. You'll be glad of this when

you hit queues and find yourself standing around waiting to move on. Then at the other extreme around midday you must make sure you're fully protected from the sun or you're likely to get very badly burnt. Whether you climb alone, in a group or a with a guide, that will depend on your own experience but however you decide to go its essential that you take your time and get used to the altitude.

Presenter: Okay, many thanks for taking the time to come in and tell US all about it!

Track 17

TEST 3 LISTENING SECTION 3

Adam: Elaine. Have you seen the exam timetable? They've just put it up on the department noticeboard.

Elaine: Yeah, I've just come from there. I must be honest. I'd put the thought of exams to the back of my mind. Now the dates are there it all seems a little scary. Have you been revising much?

Adam: No, not really. We've got a month so I'm going to really get going on it now. Why don't we try and work together?

Elaine: Yes, let's meet a few times a week. I don't like working on my own; I never seem to be able to focus properly. What about Tuesday and Thursday? Oh no... I have a late seminar on Tuesday. Monday and Thursday? What about that?

Adam: Yes, that'll be okay. How do you go about revising? Have you got any tips?

Elaine: Well, our tutor said we shouldn't start background reading or writing notes until we're clear in our mind what we need to revise. He said start with a revision timetable so we know what to revise and when.

Adam: That sounds sensible. Then we can use the timetable to work independently... It'll help US to make sure we're both working on the same subjects ... We can make that the first thing to do in our first session - write up a timetable.

Elaine: Okay. I reckon the kinds of things we can do on our own in between meetings are things like arranging our materials - lecture and seminars notes, handouts, feedback from our tutors, that kind of thing. If we arrange all these by subject, according to the timetable, it will help US get organised.

Adam: Good idea. Once we have all the content I suppose we could make

notes based on past exam papers. We had a talk about note taking in one of the seminars. They reckon you shouldn't copy word for word. It helps to learn things if you paraphrase main points. And don't just copy loads of facts either ... try to get a feel for the main arguments or theories and match any facts to these.

Elaine: I also like using mind maps or spider grams when I make notes. It means you can put down a lot of information but so that it's nicely organised. It also means you can add new notes after. And bullet points ... they really help you focus on main points rather than trying to link them together in sentences.

Adam: We also need to remember to make a note of where the information comes from - the author, publisher that kind of thing.

Elaine: That's really important... otherwise when you're writing th assignment you can never remember where you got a particular quote from.

ADAM: I know I said earlier about testing each other when we get together but, now I think about it, do you think it would be a better idea to talk through our notes on a particular Subject, have a kind of discussion between ourselves? We could use the questions in the past papers to base the discussion on.

Elaine: Yes, so basically the timetable can be a discussion schedule. Then after each session we could go away and do a timed essay on the subject... maybe swap and mark each other's essays. That's a good way to learn, I think; critique each other's work.

Adam: Great idea. So we'll start next Monday with the timetable...

Track 18

TEST 3 LISTENING SECTION 4

Tutor: Okay everyone. This week it's the turn of Carol to talk about the progress of her research project. Over to you Carol.

Carol: Thanks. Yes, hello everybody. I'm going to talk about something called 'shared space' and the research I'm in the process of carrying out into people s attitudes to this as it might affect them in their loca community.

First I'd best explain what shared space is. In essence, shared space is an approach to urban design that attempts to open up main street junctions more to pedestrians by reducing the dominance of motor vehicles. It's a form of planning associated with a Dutch road traffic

engineer called Hans Monderman, who believed that by sharing the space available drivers become more aware of pedestrians and drive more carefully. Pedestrians are able to move more freely in this shared space and the number of accidents is reduced.

Shared space design is usually employed in urban centres where pedestrians congregate, such as in shopping areas. It usually results in demarcations between vehicle traffic and pedestrians being reduced or removed altogether. This includes features like kerbs, road surface markings and traffic signs. There are many examples of shared space in operation abroad and in the UK, for example in Kensington High street in London and Giles Circus in Ipswich. In addition to a decline in accidents, those in favour of shared space also claim additional benefits such as a reduction in unsightly street furniture like signs and metal guard rails, which can be replaced with more trees, planters, seating areas, and other aesthetic improvements determined by local people. With these urban centres easier to get around in, supporters claim that people are more inclined to shop there and as a consequence the centre can become a more thriving area for local people and businesses. Here are some before-and-after photographs of shared space developments to give you an idea of what it looks like ...

Despite all its advantages, shared space is opposed by various interest groups. Some motorist organisations claim that the system means drivers lose important information through the reduction of signage. Those representing blind people argue that removing features such as kerbs, railings and barriers between pavements and roads takes away familiar support and means this group of people cannot negotiate their way as easily as other road users. Cyclist representatives have also criticised some aspects of the scheme arguing that despite benefits some cyclists feel more bullied by motorists and consequently less safe. Supporters of shared space themselves also point out that a lack of experience and understanding of shared space by planners can lead to negative experiences for all these groups.

To carry out my research I approached a local campaigning group in my area who are interested in adopting shared space in our local shopping centre. I discovered that they were very keen to get

feedback from local residents on shared space and because of the experience I'd gained in research methods they were keen for me to construct a questionnaire for them. The focus group have a website and an active social media presence and they decided that the questionnaire will be available as an online survey. Hard-copy questionnaires will also be used for face-to-face interviews. There were plans to leave paper questionnaires in the local library but this is still under discussion. Interviews using the questionnaires will be carried out with pedestrians in the area itself. The group don't have the resources to deliver additional questionnaires to the homes of local residents so this option was dropped.

We have met on several occasions to agree on the data the focus group need. I've pointed out that, if they want valid results, the questions must be totally unbiased and not in any way loaded to encourage participants to give the 'preferred' answer. Also we mustn't assume that participants have sufficient information to answer these questions. We're currently looking into how we can best present the concept of shared space during interviews.

I've designed some of the questionnaire and I'd just like to spend a few minutes going through it with you. I'd be grateful for any feedback you have ...

Track 19

TEST 3 SPEAKING PART 1

In this first part of the exam I'd like to ask you some general questions about yourself.

Are you currently studying at a school or college?

Why are you taking the IELTS exam?

What do you hope to do after you finish your studies?

Let's talk about food. What kind of food do you like to eat?

Can you cook?

Are there any regional specialities in your country you would recommend to visitors?

Track 20

TEST 3 SPEAKING PART 2

I'm going to give you a topic and I'd like you to talk about it for one to two minutes.

Before you talk, you have one minute to think about what you are going to say. You

can make some notes if you wish. Here is your topic.

Track 21

TEST 3 SPEAKING PART 3

We've been talking about personal possessions. I'd like to discuss this subject with you with some more questions. Do our important possessions these days tend to be technology based?

What kind of possessions often have sentimental value?

Does the advertising industry lead to US buying things we don't really need?

How should parents deal with demands from their children for things they have seen advertised⁷

Are we happier the more things we own?

Is there anything you don't have that you would like to buy?

Tracks 22 - 23

Track 22

TEST 4 LISTENING SECTION 1

Cashier:

Good morning, how can I help you?

Sandra:

Yes, hello. I'm going away on holiday next month and I was wondering if you could give me some advice about traveller's cheques.

Cashier:

Yes, of course. Where are you off to? Anywhere nice?

Sandra:

To France, to Paris for a week.

Cashier:

Ooh, lovely¹ So how many cheques would you like to order?

Sandra:

Well, before I do, are they the best option, traveller's cheques?

Cashier:

Well, they're certainly safer than taking cash. If they get lost or stolen they can be replaced, usually within 24 hours. It's a good idea to have a small amount of cash though, for snacks and taxis, that sort of thing.

Sandra:

Yes, that's what I was thinking. What about my credit card? Are there any charges for using it abroad?

Cashier:

No, it's debit cards that get charged for ATM withdrawals not credit cards. And remember anything you buy with the card might be covered by insurance so if something you buy turns out to be faulty or.

Sandra:

So it's probably a good idea to do all three then - traveller's cheques, credit card ... some cash, yes?

Cashier:

Yes. So how many travellers cheques would you like?

Sandra:

I was thinking about £300. How long will they take to arrive?

Cashier:

It depends. If you order before 2.30 between Monday and Thursday you'll have them the next day by 10.00 a.m. in the branch or if we post them to you, you'll have them by 5.00 p.m.

Sandra:

Oh, but I was hoping I could order them today?

Cashier:

That's okay. Orders taken anytime on Saturday will be here in the branch at 10.00 a.m. on Tuesday or delivered to your home by Tuesday at 1.30.

Sandra:

Okay, that's alright. I don't mind waiting until then. Can I order them now?

Cashier:

Yes. Have you got an account with US?

Sandra:

Yes. Here's my credit card.

Cashier:

Thanks. Let's just log in and I can place an order for you. Could you confirm your date of birth?

Sandra:

15th of the 3rd, 1975. What's the commission on the cheques, by the way?

Cashier:

It's 1.5 per cent. That's pretty standard, I think you'll find.

Sandra:

And what happens if I don't spend them all. Will I be able to bring them back?

Cashier:

Yes, no problem. We buy them back and there are no additional charges or conditions of return. So would you like me to go ahead and place an order?

Sandra:

Yes. Yes please.

Cashier:

Will you be coming in to collect them?

Sandra:

I don't think I'll have the chance to come into the branch on Tuesday. Could you send them to my house?

Cashier:

No problem. Can I just check your address? 54 Tavistock Road?

Sandra:

Yes, that's right.

Cashier:

Postcode CB1 3LR?

Sandra:

That's it. yes.

Cashier:

Okay. So that's £300-worth of traveller s cheques.

Sandra:

Yes please.

Cashier:

Now what about Euros? Would you like to order any?

Sandra:

No. No thank you. I still have some at home from the last holiday. I forgot to change them at the airport when we got back. I was going to give them to our daughter but I'll treat myself for a change I

think.

Cashier: Good idea. So, £300 in traveller's cheques. Could I ask you to sign here to confirm the order?...Thank you. Okay. That's done for you. Your cheques will be with you by 1.30 Tuesday. Someone will need to be at home to sign for them. Will that be okay?

Sandra: Yes. I'll be at work but my husband will be in. is that okay?

Cashier: Yes, that's fine. Have a lovely holiday!

Track 23

TEST 4 LISTENING SECTION 2

Presenter: Welcome to our monthly podcast for overseas students planning to study in the UK. This month we're looking at how to make your money last longer whilst studying here. And to help us find some bargains I have Jenny Lubeck from the student union. Jenny, students are renowned for being hard up but there are lots of savings to be made, aren't there?

Jenny: Well, as soon as students start their course at university or college they'll be able to buy their NUS extra card. This will enable them to get a wide range of discounts on essentials like books, clothes and eating out. The card only costs about £12 for one year and for about the same amount you can include an ISIC card. The ISIC is an internationally recognised discount card for full-time students. Discount offerings vary and usually include things like travel, guidebooks, music, eating out - that kind of thing. Students are told all about this when they start their studies but if your listeners want to find out more about these cards before they arrive I've put some details of websites on the podcast page.

Presenter: Now travel costs can mount up for students, can't they? I know the ISIC card is useful here but are there any other things students should be aware of?

Jenny: Understandably lots of overseas students like to take the opportunity to travel around the country whilst they're in the UK and for this reason I'd strongly recommend they invest in a Young Person's railcard. To be eligible you need to be between 16 and 25 ... mature students over the age of 25 can also apply so long as they're in full-time education. You can buy a one-year or three-year card, and it gives you a third off rail journeys across the UK. The card also gives

you access to competitions and things like theatre discounts and holiday offers. At the moment, a one-year card costs £28, and it's £65 for a three-year card.

Presenter: And what about buses?

Jenny: Erm, well, as well as the railcard, it's also more than likely the local bus operators will offer discounted bus travel with their own travel cards. These aren't aimed specifically at students but can still save you a lot of money if you use the buses regularly. You can usually get these cards for a week, a month, a term or a whole year with bigger savings the longer the period. Another advantage of these cards is that as well as making it cheaper to commute to and from university you'll also find them very handy free transport whenever you need to do some shopping or visit friends in your area.

Presenter: Are there any cultural things that students coming to the UK might not be aware of that can save them money?

Jenny: Some overseas students are surprised by the amount of recycling that goes on in the UK and how much money can be saved in the process. They'll be a roaring trade in used course books in the student union on campus. Lots of students who were on the same course as you the year before will be selling their books at the end of their course - they'll be a lot cheaper than buying them new. Off campus you'll find lots of charity shops in your local town centre with a good selection of novels and you'll often get some really nice clothes. CDs and DVDs that people have donated and all at very cheap prices. Of course, shopping in this way means you're contributing to a worthwhile cause as well. And check your local paper frequently for car boot sales. Car boot sales are a very British style of market where private individuals come together to sell home and garden goods. In fact they're a great way of recycling some of your own unwanted stuff and can help you make some money in the process. Finally there are websites and mailing lists where local people offer up items they no longer want, for free - as long as you agree to collect them ...

Tracks 24 – 28

Track 24

TEST 4 LISTENING SECTION 3

Tutor: Hi everyone. I know you have lots of questions about the college intranet - my inbox is full of messages! I thought it would be quicker and more useful to come in and talk to you rather than respond to all the messages. I'm happy to answer or try and answer any questions you have - about how to use it, when we'll be making things available online ... I'm the ICT champion for the department so hopefully I'll be able to help. Yes Mark - fire away.

Mark: Can you tell US when the assignments are going to be put online?

Tutor: If you're talking about your second assignment, that should be on already. I uploaded it last Monday Wait a minute - let me check the schedule ... Here we are ... No, tell a lie * it was the following day, the 14th, Tuesday 14th October. Have you logged into the intranet yet?

Mark: No. If the assignment's there I'll download it after we've finished. Are you putting all the assignments up?

Tutor: Yes. I've been waiting for your subject tutors to email them to me. As soon as I have them all I'll put them online. There's a deadline of 24th November... all course assignments need to be online by then. That's college policy for all staff so they'll be there then for sure.

Mark: Will there be anything else? Timetables, trip information ... that kind of thing? Only there wasn't much online for our course last term.

Tutor: I know. But we're making more of an effort this time. We'll be releasing your marks for the first assignment soon - that'll be 17th November. You'll find them in your 'My Grades' area. Again, the timetables are already there, Mark. You need to log in! I made these available at the beginning of term in September. According to the schedule here, the booking forms for those who want to go on the Belgium trip will be available next week on 29th October, so don't forget to check then. You need to get these back to US quickly if you want to go ... the trip's coming up soon, isn't it? Let's see ... yes 19th November. Now, remember there are lots of learning materials on the intranet as well... quizzes, weblinks ...

Claire: Sir, wouldn't it be easier if we were just given the documents ... so we don't have to go online to get them?

Tutor: I know it seems a little frustrating Claire but we're doing it this way for a good reason. We're trying to cut down drastically on the amount of paper we get through. I'm afraid that students are always losing documents we give out in class so we've decided to stop doing this.

You have a limited printing allowance, which means you'll probably be more careful with any documents you have to print off. Besides, it means you'll always know where the information is when you need it. If you're at home and you forget an important date or need a document urgently you can always log in to the intranet and get it.

Claire: You said something about quizzes sir ...

Tutor: Yes, we've had permission from the exam board to put some of their past papers online in an interactive form. That means you'll be able to get answers immediately with some feedback ... They'll make a nice change from using the paper copies. Most of them are already online and 1TI be putting the rest on over the next couple of weeks. As I said, these are authentic past papers so you'll get a really clear idea of your progress. Just to let you know, the technology tracks your scores so your tutors will be able to tell who's having problems and what areas of the syllabus you might need help with, so it's definitely worth spending some time doing them.

Track 25

TEST 4 LISTENING SECTION 4

Good afternoon. Today we're continuing our investigation into obesity. We've looked at several factors causing obesity including lack of exercise and a general sedentary lifestyle and the role the media plays in promoting the consumption of high-calorific food, in the coming weeks we'll go on to examine serious eating disorders such as anorexia nervosa and bulimia nervosa.

The decline in formal eating times within the family and the subsequent increase in the degree of snacking' that takes place have had a significant effect on obesity. Today we're going to turn our attention to an example of this, what has been termed 'emotional hunger' or 'emotional eating', as opposed to the consumption of food to satisfy a physical need. Studies have uncovered how our emotional state can lead to US eating more than we physically need. It was originally believed that negative emotions brought on through depression or anxiety were the main cause of this. But it is now acknowledged that positive emotions can have a similar effect on our eating habits.

Not everyone is susceptible to emotional eating, and even those who do suffer have highly individual symptoms. However, there are common themes. It seems that people who are already overweight are more susceptible to emotional eating when suffering negative emotions than those who are underweight. Equally, excessive eating of this kind can happen during or after happy events, when larger meals than normal tend to be eaten.

So what are the signs that someone is eating to satisfy an emotional stimulus? Well, there are several differences between emotional and physical hunger.

Those experiencing emotional hunger will feel the urge to eat all of a sudden. This compares to the gradual sensation of hunger that occurs with a physical stimulus.

Interestingly, and I'm sure many of you will recognise this, when you're eating to satisfy an emotional need for food, the craving will often be for a specific item like a pizza or something sweet like ice cream. In this kind of situation, nothing else will really satisfy the craving. When the urge to eat is driven by a physical need, you're far less bothered about what you eat.

Emotional hunger makes the individual feel the craving must be satisfied immediately by whatever the specific kind of food is. I'm sure we've all experienced that feeling: 'I must have some chocolate ... now!' In contrast, the need to satisfy sensations of physical hunger seems less urgent.

Emotional eaters will carry on eating even when they're full. A person eating to satisfy a physical hunger will be more likely to stop.

Finally and probably not surprisingly, feelings of guilt often follow emotional eating but not when eating normally.

This has serious consequences for those working with patients suffering with obesity. One way to deal with this is to educate sufferers into understanding the different symptoms of physical and emotional hunger and to try to help them identify the pressure points during a typical day when daily stresses occur. Being conscious of one's eating habits is the first step in dealing with the problem.

Track 26

TEST 4 SPEAKING PART 1

In this first part of the exam I'd like to ask you some general questions about yourself.

Do you come from a large family?

Have you got a favourite relative?

How often do you get to see your wider family?

Let's talk about work. Do you have any definite career ambitions?

How easy is it to find work where you live?

If you could do any job you liked, what would it be?

Track 27

TEST 4 SPEAKING PART 2

I'm going to give you a topic and I'd like you to talk about it for one to two minutes. Before you talk, you have one minute to think about what you are going to say. You can make some notes if you wish. Here is your topic.

Track 28

TEST 4 SPEAKING PART 3

We've been talking about the subject of places we would like to live. I'd like to discuss this subject with you with some more questions.

What is it about a place that makes it feel like home?

Is it important to live close to your relatives?

What are the main reasons people decide to move to another location?

What are the kind of things a family looks for when deciding where to live?

Why do some people choose to leave their own country and live abroad?

Do you think people who want to move to another country have a realistic idea of what it will be like?

Writing: model answers

Test 1 Task 1

The table shows the changes in household types in Great Britain at 10-year intervals from 1971 to 2001 and again in 2007.

There has been a steady increase in households without children during this period. One-person households doubled from 6% in 1971 to 12% in 2007, whilst the percentage of couples with no children rose from 19% in 1971 to 23% in 1991 and to 25% in 2001. However, this figure leveled out in 2007. Even bigger changes have occurred when it comes to couples with dependent children. This category shrank from 52% in 1971 to 36% in 2007. In contrast, the percentage of lone parents trebled over the same period, rising from 4% in 1971 to 12% in 2007. The percentage of families with non-dependent children has remained more stable: 10% in 1971, rising only 1% over the next 20 years before falling to 9% in 2001.

In conclusion, the table shows definite patterns of change within the British family over the past 40 years, in particular the decline in the traditional model of one couple with dependent children.

Test 1 Task 2

It is certainly true that, taken as a whole, the tourist industry generates huge SUTS of money for the global economy. Moreover, the local economies of resorts around the world are often dependent on the influx of visitors every year, particularly with regards to local employment. My own country welcomes huge numbers of overseas visitors annually, and a significant number of people are employed in the hotel industry as a result.

However, it is sometimes argued that a significant share of the money generated goes not to the Local economy but to the multinational companies that supply the transport to and from the destination and the hotel chains and shopping outlets that offer hospitality to these visitors. Critics also point to the negative effect of tourism on local culture. The way of Life of indigenous people can often be undermined by developments that prioritize the needs of the visiting tourist. Finally there is the widespread effect of tourism on the environment. The arrival of huge numbers of tourists

can be a drain on scarce local resources such as water, food and energy. Pollution, both through an increase in passenger flights and the local waste generated at the tourist destination, is another environmental concern. Then of course there is the physical impact on the landscape and ecosystem of large-scale construction.

Nonetheless, it is probably wrong to claim the problems are being ignored. The growth in sustainable tourism is evidence that people are aware of the impact they are having and are keen to contribute to a more positive experience, for themselves as well as for local people and the environment. As the market tends to determine how things develop, we can only hope that the demand for this form of responsible tourism continues to grow.

Test 2 Task 1

The bar charts compare the growth in holders of full car driving Licences by age and sex between 1975 and 2006.

By 2006 the percentage of male licence holders peaked at just over 90% at ages 50-59 and over 85% for all ages from 30 to 69. Compared to 1975/76, there was a slight decrease in the percentage for males at ages 21 -29. whilst the increases in certain other categories were slight: about 1% for the 17-20 and 30-39 categories, for example. Increases were more significant for older age groups, with the 70+ category doubling.

For females, in comparison, the increase over the 30-year period has been far greater amongst all age groups. For example, while just over 80% of males in the 40-49 category held a driving licence in 1975/76, rising to almost 90% in 2006, the percentage of women in the same category more than doubled, from just below 40% in 1975/76 to almost 80% in 2006. The percentage of women licence holders between 60 and 69 has more than trebled to over 60%, and the figure for the over-70s has increased by approximately six times to 30%. These figures appear to show that the numbers of female and elderly licence holders have increased in line with their greater economic independence over this period.

Writing: model answers

Test 2 Task 2

The emergence of new technology over recent years has brought a wealth of learning opportunities into the home or workplace. Powerful computers aligned with the Internet mean that students can access websites and podcasts, and enter into even live communication with other students from around the world through video conferencing technologies. This, along with the explosion of freely available learning content should mean that students choosing to study English on a self-study basis have all the opportunities they need to progress. However, is this really the case?

One of the benefits of studying formally as part of a small group or class is that the school will have a system in place to manage the learning process. Each teacher will be required to follow a syllabus and will try to make sure that all the necessary content and skills are covered, and in the best order to facilitate learning. However, students working independently will often not have access to this expertise and will be left alone to organise their own learning. This might have serious consequences for students working to a tight deadline, for example, with an intention of passing an exam. Will they spend too long on practice tests and not enough time on learning exam strategies? Will they have an appreciation of how best to develop their English skills generally? Knowing what is required and when to learn it is probably something that the teacher has a better awareness of than the student.

To sum up, a great deal can be learnt independently and the main requirements for success are always motivation and hard work, qualities that the self-study student often possesses in abundance. However, I do feel that an experienced teacher can offer students a structure to their studies that will mean they spend their time more efficiently and effectively than when they study on their own.

Test 3 Task 1

This bar chart examines people's perceptions of being a victim of crime compared to the actual risks involved over two periods, 2009/10 and 2010/11.

For all three crime types, the fear of being a victim is far greater than the likelihood of becoming one. The highest figures relate to car crime and show that, during both periods, around 4% of the population were victims, with a very slight decline in 2010/11. In contrast, the fear of being a victim of this crime was

recorded at about 21% in 2009/10, falling to approximately 17% in 2010/11. The perceived threat from the other two crimes, burglary and violent crime, were roughly the same over both periods: just over 15% in 2009/10. falling to about 13% in 2010/11. However, in both cases the real risk was far lower at between 2.5 and 3% for burglary and violent crime.

However, figures for the perception of the threat of crime have shown a marked fall in all three cases over the two- year period, falling by 2-4%. This may show that people are gaining a more realistic view.

Test 3 Task 2

Despite vast improvements in the position of women in society over the past half a century, we are still some way from achieving gender equality. Women who were around in the 1760s or 70s are surely struck by the significant improvements in the lives of women in the twenty-first century. However, they must also find familiar evidence of major inequalities.

Women in the West have made great headway in the fields of education and employment over the past 50 years. Women often out-achieve men educationally, and are entering occupations and professions that would once have been out of bounds. They often attain high positions within organisations and in some countries have even risen to the top of political power. Successful female entrepreneurs often appear in the media, perhaps leading some to conclude that women are now competing on a level playing field.

However, if we look more carefully we soon see that significant problems still exist. Women suffer inequalities in employment and have yet to achieve pay that is equal to that of men doing similar work. In addition, women are generally still responsible for child rearing and housework, creating a 'double burden' for those who work full time. Moreover, despite the success of some women in gaining positions of influence, these are the exception rather than the rule, and women are still outnumbered in positions of power. Finally, the dominant view of women in the media IS not one of successful entrepreneur or public figure but of 'sex object', a situation that has barely changed over the past 50 years.

Consequently, despite some very real gains, I feel that women of the previous century must see much that they recognise when observing the position of women in society today.

Writing: model answers

Test 4 Task 1

The two tables together give a snapshot of the reasons people choose to stop smoking and when they intend to give up.

The main reason smokers give for stopping IS for general health [71%), with financial considerations (31 %) and the risk of smoking-related diseases (25%) being the next two most popular reasons. One fact to highlight from this table is that almost twice the percentage of heavy smokers cite present health problems as the reason compared to light smokers.

According to the second table, the majority of smokers questioned (71%) intended to give up, with light smokers more inclined to stop (77%) than heavy smokers (60%). 35% of smokers said they were planning to give up within the next six months and only 12% said they were prepared to try within the following month. Although only 29% of smokers on average were unwilling to give up. heavy smokers were almost twice as unwilling to try as light smokers, which perhaps reflects the Level of addiction in the former group.

Test 4 Task 2

Taking a year off from education between finishing school or college and going to university is a popular choice for young people. Generally speaking, doing so does not negatively affect their educational progress and, depending on how the time out is spent, can Lead to invaluable experiences before moving into higher education.

For example, one of the most popular reasons for taking an educational break is to travel, This offers the student an opportunity to come face to face with different cultures, to meet new people and in some cases will open up new opportunities abroad that may not have arisen at home. Alternatively, some choose to spend the period in work. This could be in the voluntary sector, on conservation projects or in paid work, for example as an au pair or even teaching English overseas. The skills and experiences gained can be extremely useful at university and when looking for employment afterwards.

However, taking a year out can have its drawbacks. To begin with, it means spending a year away from studying. Returning to it and regaining the discipline and focus required can be difficult for some. Additionally, the break can lead to

carefully laid plans being blown off course if attractive offers of work or further travel become available.

Nevertheless, it is probably true to say that the benefits far outweigh the drawbacks. The time spent away from education gives the person the chance to reflect on life and any important decisions before signing up for a lengthy and expensive period of study. What is more, the experiences gained during the year out will build self-confidence and maturity, qualities that will prove invaluable in the years to come.

General Training Test A Task 1

Dear Sir or Madam,

I am writing in reference to the advertisement you placed in the Stansfield Observer for waiters and waitresses.

I am 22 years old and I am a part-time student at college. I have held several positions in catering outlets during my studies and, as the restaurant where I am currently employed is due to close, I am keen to find another position as soon as possible.

i have completed and passed the advanced certificate in food hygiene and am therefore familiar with the requirements of working in the catering industry. In my current job, in addition to working as a waiter, I am also responsible for counting up takings at the end of the day.

I am very reliable and trustworthy, have a friendly, outgoing personality and enjoy dealing with the public. I would be very grateful if I could be considered for the position. My employer is happy to supply a reference and I am available for interview at any time except Tuesday and Thursday afternoons when I attend college.

Please do not hesitate to contact me should you have any questions.

I look forward to hearing from you.

Yours faithfully,

General Training Test A Task 2

The growth in supermarkets is a direct result of the convenience they offer consumers. Being able to park the car easily, and to put all your shopping in a trolley that can then be pushed to the car and home in an hour or two makes life a lot easier for people who are short of time. Furthermore, thanks to the competition between supermarket chains and the power they have in negotiating the lowest prices from their suppliers, the cost of goods is kept to a minimum.

Such convenience has a consequence, however, as small, independent shops

find it very difficult to compete with these megastores. To begin with, parking in inner-city shopping centres can be very difficult, which makes it hard to attract customers to the area. And for those who are fortunate enough to find parking, the thought of carrying bags from one shop to the next in order to do the weekly shop is seen as rather cumbersome. In addition, these small shopkeepers are unable to compete on price with the supermarkets as they do not buy in such bulk. The result is that many high streets are littered with empty, boarded-up shops, increasing the likelihood of crime and vandalism

Therefore, I would argue that supermarkets do have a negative impact on local communities. However, due to the convenience they offer it is unlikely that they are ever going to disappear. Consequently, in order to stay in business, small shops will have to use the advantage they have of being more personal, and offer a friendly, niche service.

General Training Test B Task 1

Dear Sir,

I am writing with regards to the complaint I made to you on 21st November concerning the stay I had at your hotel the previous night.

You may remember that on the day in question, you had a serious problem with your central heating system and that there was a great deal of noise, which started as early as 4 o'clock in the morning. Not surprisingly, this resulted in a very poor night's sleep for my wife and me. We complained about this to you when we checked out. You agreed that we had a cause to complain and assured me that you would be contacting US regarding compensation.

It has now been three weeks since that conversation and we have yet to hear from you. Could you please confirm that this issue is being dealt with? I would also be grateful if you could let me know when we can expect to be told the amount of compensation we will be receiving.

I look forward to hearing from you very soon.

Yours faithfully,

General Training Test B Task 2

Young people today are often reprimanded by their parents for living a passive

lifestyle. In my country, for example, young children in particular are criticized for spending too long interacting with technology rather than being outside playing sports, climbing trees and doing all the other activities their parents claim they enjoyed as children. To what extent are these comments deserved?

On the surface, they would appear justified. There is a whole industry that encourages children to lead a sedentary lifestyle, for example sitting in front of a PC or games console. Dedicated satellite or cable TV channels for young people offer the chance to sit idly watching one programme after the next, often repeats of something that was on the day or week before

However, it can also be argued that young people are adapting to the society they live in, a completely different place to the world their parents grew up in. Firstly, the roads today are far busier than they were in the past, which makes it very difficult for children to play outside, Secondly, children are often restricted from being outside by parents who have become overly concerned about dangers they imagine exist outside their four walls. Finally, it has to be said that many parents use the technology they complain about as a way of keeping young children occupied.

think children today are less active and that it is something we should be concerned about. However, it is wrong to put the blame on technology. Children should be encouraged more to take up sports at school and parents should be more willing to support their children in exploring the outside world.

Speaking: model answers

Track 29

Test 1 Part 1

in this first part of the exam I'd like to ask you some general questions about yourself. Where do you live ?

I live in Portugal in a place called Figueira da Foz ... It's not far from Coimbra,... which is a famous university city.

is it a nice place to live?

Yes, very nice... It's on the coast... It's a tourist resort so there are lots of things to do there ... especially in the summer.

Do you have many tourists visit your area?

Yes... it gets very busy in the summer... with Portuguese and overseas visitors ... but I like seeing the place come to life when all these people arrive.

Let's talk about your interests. Do you have any hobbies or interests?

I really enjoy swimming and surfing ... We host surfing competitions in Figueira and I became interested in it when I was younger ... My father used to take me and I really enjoyed it.

Have you seen a good film recently?

i haven't been to the cinema for quite a long time actually ... I study most evenings and it's not something I often do ... go to the cinema that is ... I watch films on TV occasionally but I can't bring to mind any particular ones at the moment.

How often do you go out with friends?

Most weekends ... There are lots of bars and cafes near where I live and we also spend time hanging out on the beach after college when it's warm enough.

Test 1 Part 2

I'm going to give you a topic and I'd like you to talk about it for one to two minutes. Before you talk, you have one minute to think about what you are going to say. You can make some notes if you wish. Here is your topic.

A well-known person I admire ... That's a tricky question ... I can't say I've ever given it much thought ... I suppose an obvious person is someone like Nelson Mandela ... the ex-President of South Africa ... Most people who have admirable qualities also

seem to have a darker side ... Maybe they're very ambitious or change their attitude or behaviour and you no longer find them quite so admirable ... That's often the case with politicians ... but someone like Mandela ... he spent all that time in prison because of his beliefs ... and he stayed true to what he believed in throughout all those years in prison He won over the hearts of the people of South Africa, whatever race they were ... I can remember the day he was released from prison and also the time South Africa hosted the World Cup ... Mandela made a speech and it seemed to capture the hopes of the whole nation. ... I think his reputation is based on values like courage, respect for others ... being a great statesman ... Whenever someone important - another politician for example - was pictured with him they always seemed to be insignificant in comparison ... I suppose I admire him for the same reason I admire anyone who stands up for their principles no matter what Life throws at them ... and particularly with Mandela - he stood up for something that everyone should hold dear... equality and freedom from oppression and prejudice ... Yes ... Nelson Mandela that's who I admire.

Test 1 Part 3

We've been talking about the subject o! fame and celebrity. I'd like to discuss this subject with you with some more questions. Do you think being famous is a worthwhile ambition?

No ... not simply to be famous ... That's the problem with the people on reality TV shows - they sometimes say they want to be recognised ... to be famous ... I think the ambition should be for what you do ... not just to be well known.

Who are currently some of the biggest celebrities in your country?

Well — I suppose our politicians are well known ... to Portuguese people anyway ... and then of course there's José Mourinho and Cristiano Ronaldo ... They're very well known ... if you like football that is ... I think I'm more proud of people like Fernando Pessoa ... our great poet - not a celebrity, I know, but very famous around the world.

Do celebrities deserve the attention they get from the media?

I think the media needs celebrities and celebrities need the media - they live off

each other ... Most of them don't deserve all the attention but news about attractive celebrities sells newspapers and magazines 50 I suppose it's just natural.

Does fame generally bring happiness to the individual?

I don't know, really ... It's a little like the earlier question ... whether fame itself is worth aiming for ... If you are happy doing whatever it is that makes you famous, then perhaps yes ... but sometimes fame can interfere with your life.

Do well-known people suffer a loss of personal privacy?

Definitely ... yes ... As I just said ... fame can interfere with your day-to-day life ... Celebrities can be hounded by the paparazzi as soon as they leave their homes and stories can appear about them in the media that may or may not be true ... It's not something I'd like.

If you could be famous for doing something, what would it be?

I'd like to be well known for being a great surfer ... maybe like Gabriel Medina or Adriano De Souza - they're well-known surfers ... probably not famous to people who don't know about surfing but that wouldn't matter to me.

Track 30

Test 2 Part 1

In this first part of the exam I'd like to ask you some general questions about yourself. How long have you been studying English ?

A long time ... I studied it at school for several years and then carried on when I went to college ... probably about six years now.

Do you enjoy learning another language ?

I love it — It's not learning the grammar and vocabulary that I enjoy - that's the hard part - but once you reach a level where you can listen to the radio or watch films in that language or read books in that language ... that's what I find satisfying.

What subjects did you find interesting at school?

Well... as I said ... languages were fun ... once I reached a higher level... but I suppose my favourite subject was art ... I still attend art classes and love drawing

and painting ... It's something you can get totally engrossed in ... It's very relaxing.

Let's talk about travel. Have you been on holiday recently?

Not this year no ... but last year I went to France with my family, to Paris ... We spent a week there ... seeing all the sights and visiting some of the other important towns and cities ... Bordeaux ... Nice ... It was really good fun and the weather was excellent.

Speaking: model answers

What is our favourite form of transport ?

That's easy - the train ... I love travelling on my awn on trains ... It's a great way to see the landscape you're moving through and you also get the chance to meet local people who share your carriage ... If I had the chance I'd spend a year travelling around the world by train.

Where would you like to spend a two-week holiday if you could go anywhere?

I suppose China ... although two weeks wouldn't be long enough to visit all the places I'd like to see ... It would be fantastic to travel on some of the main train routes between the major cities - second class of course - so I could share the journey with ordinary local people.

Test 2 Part 2

I'm going to give you a topic and I'd like you to talk about it for one to two minutes. Before you talk, you have one minute to think about what you are going to say. You can make some notes if you wish. Here is your topic.

I went on a caravan holiday with my parents once ... I was probably about nine or 10 at the time ... and the caravan park had a restaurant called 'The Matchbox Bar' ... The walls of the restaurant were absolutely covered with matchboxes from all over the world ... I can still picture it now ... it really was quite a sight... Anyway it certainly grabbed my imagination ... I had friends who collected stamps ... but matchboxes ... I'd never hard of that... so as soon as we got back home I started collecting them myself... I used to ride around the streets where I lived looking for matchboxes people had thrown away ... You'd be surprised how many different ones you could find in one journey ... And relatives used to bring me some back from their holidays abroad ... That was always really exciting ... You used to be able to get packs or sets of them ... I remember the matches were waxy ... from Spain I think ... the boxes all with a different image on the front... The collection just grew and grew ... I remember having over 3.000 different ones at one point... That was a long time ago but now I think about it ... f remember really enjoying myself... It was just good fun really ... seeing the collection get bigger and bigger... As you get older it's difficult to re-create that sense of fun you have as a child ... It's a pity ... but anyway ... that's a hobby of mine I really enjoyed.

Test 2 Part 3

We're been talking about the subject of hobbies and interests. I'd like to discuss this subject with you with some more questions. What are the benefits of having a hobby or an interest?

I think there are several... It allows you to switch off from work or your studies and focus on something else ... Depending on the hobby, it might help you keep fit or get out of the house ... You can meet other people with the same interest ... So there are lots of benefits.

Do hobbies change from generation to generation ?

The young people I know don't have the hobbies my parents had - collecting stamps ... or. like me, collecting matchboxes ... I'm not sure that kind of thing interests people these days ... Perhaps children grow out of wanting to collect things at a younger age now ... Playing instruments is popular with my friends and that's timeless, isn't it?

In what ways can hobbies or interests bring people together?

Well ... taking my last point - playing music - this must be especially enjoyable when you play with a group of people rather than on your own ... I suppose it's the same with any interest - when you can share your love of it with others it brings you closer together.

Are there any hobbies that can lead to work in the same area?

Perhaps something like photography ... This could always lead to you being asked to take photos at weddings or birthdays ... Maybe eventually you could get a job as a photographer ... I suppose any creative hobbies could result in the person setting up their own business ... making jewellery... art... that kind of thing.

Has the use of technology in the home led to a decline in hobbies ?

Possibly yes ... because we spend so much time on social networking sites and it's so easy to do ... You only need a smart phone handy and you can waste hours texting and browsing the web.

Are some people put off taking up some hobbies because of the cost involved?

Certainly... yes ... If you take something like golf... a lot of people I know play golf but it can cost a fortune ... There's the equipment... the club membership fee ... I'm sure there must be lots of hobbies like that that deter a lot of people.

Track 31

Test 3 Part 1

In this first part of the exam I'd like to ask you some general questions about yourself. Are you currently studying at a school or college?

Yes ... I'm studying at a Language school in town ... I came at the beginning of the year on a short course and liked it so much I booked myself onto another one.

Why are you taking the IELTS exam ?

I need it to get into university ... It's a general entry requirement for all overseas students and I need to get 7 ... but I'm also doing an entrance test at the university as a back-up ... just in case IELTS doesn't go to plan.

What do you hope to do after you finish your studies ?

I'm hoping to go into teaching ... After I've finished my degree I want to do a postgraduate course so I can teach in high school... Ideally I'd like to teach history ... that's the subject I plan to study at university.

Let's talk about food. What kind of food do you like to eat?

I eat anything really... but if I was going out somewhere for a special meal I'd probably choose a Thai restaurant... I adore Thai food ... It's very expensive in my country ... but that's definitely my favourite cuisine.

Can you cook?

Yes ... I enjoy cooking a lot... I only learnt recently... after I left home to come here to study. I live in a shared flat so I've had to learn how to cook ... I'm not very good but I enjoy it.

Are there any regional specialities in your country you would recommend to visitors?

The most famous food from my country is pasta, of course, and there are lots of different kinds ... Most people know the famous dishes like cannelloni... spaghetti bolognese ... I think I would recommend trying spaghetti alle vongole ... It's a seafood pasta from Rome ... It's delicious.

Test 3 Part 2

I'm going to give you a topic and id tike you to talk about it for one to two minutes. Before you talk, you have one minute to think about what you are going to say. You can make some notes if you wish. Here is your topic.

I'm afraid it's not very imaginative but I think the most important possession I have

is my phone ... At least that's the thing I use most often each day... I'm not particularly attached to it... It's only a phone, after all, and I'll probably change it for another one in time ... but it's so practical... I think I'd be lost without it... How long have I had it? Well... I got it last year just before I came to England My parents bought it for me as a going-away present... also, I think, because they wanted to make sure I kept in touch with them regularly... It's a smart phone ... so I use it to text and speak with my mum and dad, but it's also a great way to keep up with the news... I don't bother buying newspapers because I can read everything online ... In fact that's the first thing I do when I wake up - I check to see if I have any messages then read the main stories in the news ... What else? I listen to music on it... I download podcasts from

Speaking: model answers

some of my favourite radio shows ... watch videos take lots and lots of photos ... then there's the sat nav which is really useful as well... The one in my car isn't very reliable ... The sat nav on the phone updates itself regularly so it's very accurate Yes .I use it all the time ... (doubt if an hour passes without It being used for one thing or another ... so that's my most important possession.

Test 3 Part 3

We've been *talking about* personal possessions. *Id tike to discuss this subject with you with some more questions. Do our important possessions these days tend to be technology based?*

I think most young people want to have all the latest gadgets - phones... PCs ... laptops ... games consoles ... (don't know which of these people regard as their most important though ... maybe none of them.

What kind of possessions often have sentimental value?

Probably things that have been bought as a present by loved ones ... and things like jewellery to celebrate a wedding or engagement... Family photographs and videos as well - these aren't worth money as such but are really important memories of our past.

Does the advertising industry lead to US buying things we don't really need?

Definitely yes ... especially with things like technology ... We're always being told to upgrade our phone or computer when the one we have is perfectly okay ... When

you walk around big stores there are shelves full of things that we don't really need but end up buying so ... yes I think it does.

How should parents deal with demands from their children for things they have seen advertised?

It must be very hard for parents ... In my country there are adverts all the time aimed at children and they probably always want to have things their friends have ... I think if I had children I would just explain that they can't have everything they see ... Otherwise they can easily become spoilt.

Are we happier the more things we own?

Not really, no ... We get excited about getting things we don't have - the trip to the shop to buy some new clothes is always enjoyable - but, once you have the things, I don't think it makes US any happier really . . we just end up wanting something else.

Is there anything you don "t have that you would like to buy?

I don't think so ... I have everything I need ... maybe a new laptop but I don't really need one – it's just the idea of having a shiny new one that's appealing ... No, I don't need anything at the moment.

Track 32

Test 4 Part 1

In this first part of the exam I'd like to ask you some general questions about yourself. Do you come from a large family? No ... just me, my mum and dad, and my younger brother... My father comes from a large family ... I think he had 11 brothers and sisters when they were all alive ... but we're quite a normal sized family.

Have you got a favourite relative?

My Nan is probably my favourite ... She's very kind and a really good conversationalist... always asking about my studies ... my friends ... She's the oldest of all my relatives ... 91,1 think ... but still very active.

How often do you get to see your wider family?

Not very often actually ... We get together al big family celebrations but these don't happen very often ... so only once a year maybe ... We all live a long way from each other as well so it's difficult to meet up frequently.

Let's talk about work. Do you have any definite career ambitions ?

Yes ... i hope to become an architect... My father s an architect and I've always been fascinated by his work ... He's always building scaled-down models of buildings at home – there's always one on his table in his study – I think it's a really creative job ... That's what I want to do.

How easy is it to find work where you live?

Generally it's quite difficult... I Live in a small town and there aren't many opportunities to work locally ... You have to travel into the main cities ... and at the moment there's a lot of unemployment so it's not easy,

If you could do any job you liked, what would it be?

Well... becoming an architect is my real ambition and I think I'll be very happy dong that... I suppose a dream job would allow me to travel around the world and visit all the major cities ... Maybe if I can become an architect who travels the world ... that would be fantastic.

Test 4 Part 2

I'm going to give you a topic and I'd like you to talk about it for one to two minutes.. Before you talk, you have one minute to think about what you are going to say. You can make some notes if you wish. Here is your topic.

I'm not sure I'd like to live there permanently but I'd love to have a flat in Amsterdam in the Netherlands ... I've been there two times – the last time was with my family and on both occasions I really enjoyed myself... It's like a lot of big cities in some ways – a very busy centre with thousands of tourists ... We stayed in a suburb about 20 minutes from the centre ... It was very cosmopolitan ... lots of different restaurants with food from all around the world ... It was lovely ... There are a few things I really like about Amsterdam ... the architecture for one thing – we went into a library and it was so bright and spacious ... very modern looking – then there are the parks – we went to a couple and they were really peaceful... even the one right in the middle of the city... I can't remember the name now ... But the thing I liked most of all is how well cyclists are treated there – the roads seem to be divided up so that the trams and the cars can share one bit and the cyclists get a wide lane all to themselves ... There are cyclists everywhere and they all seem to be totally confident and safe ... In my country cycling on the busy roads is very dangerous – it's really not something I enjoy – but there in Amsterdam it seemed to be the best way to travel... It gets quite cold there in the winter so I wouldn't want to be there all year... but it would be lovely to have a place to stay in the spring and summer ... That would be good.

Test 4 Part 3

We've been talking about the subject of places we would like to live. I'd like to discuss this subject with you with some more questions. What is it about a place that makes it feel like home?

If you mean the area, I think people make the difference - having people you recognise and can say hello to ... that's a sign you feel at home ... As far as your own house is concerned, I think making it cosy and warm is the best way to make it homely.

Is it important to live close to your relatives?

When your parents get older and need taking care of... yes it's important to live close to them ... other people ... like brothers and sisters ... when you live a long way away from them it means you don't get to see each other very frequently so it would be nice to live quite close.

What are the main reasons people decide to move to another location?

Usually because of work I suppose - you might get transferred from one office or factory to one in a different city ... And when people retire they often decide to move away from the city into the country ... somewhere they can relax and enjoy the countryside.

What are the kind of things a family looks for when deciding where to live?

If you have young children it's important what the nearest schools are like ... Then the transport system - people usually like to live near a train station but not too close to busy roads ... Shopping as well - people like to have some shops nearby ... I think they also worry about crime and whether it's a safe place to live.

Why do some people choose to leave their own country and live abroad?

Possibly the weather ... they might live in a cold climate and want to live somewhere that gets a lot more sunshine throughout the year ... It might also be for the same reason I mentioned before - they move because of their job perhaps.

Do you think people who want to move to another country have a realistic idea of what it will be like?

I think often they probably don't... not if they're moving because they spent a few weeks on holiday there once a year ... You probably don't get a true impression of a place when you're a tourist... Maybe you see all the good things and don't get to discover things that might be a problem if you live there permanently.
