**Exercise 4: Read the following passage on commuting, and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the questions.**

As computers have become powerful tools for the rapid and economic production of pictures, computer graphics has emerged as one of the most rapidly growing fields in computer science. **It** is used routinely in such diverse areas as business, industry, art, government, education, research, training, and medicine.

5 One of the initial uses of computer graphics, and ultimately its greatest use, has been as an aid to design, generally referred to as computer-aided design (CAD). One of its greatest advantages is that designers can see how an object will look after construction and make changes freely and much more quickly than with hand drafting. For three-dimensional rendering of machine parts, engineers now rely heavily on CAD. Automobile, spacecraft, aerospace, and ship designers use CAD

10 techniques to design vehicles and test their performance. Building designs are also created with computer graphics systems. Architects can design a building layout, create a three-dimensional model, and even go for a simulated "walk" through the rooms or around the outside of the building.

15 Business graphics is another rapidly growing area of computer graphics, where it is used to create graphs, charts, and cost models to summarize financial, statistical, mathematical, scientific, and economic data. As an educational aid, computer graphics can be used to create weather maps and cartographic materials. Computer art also has creative and commercial art **applications**, where it is used in advertising, publishing, and film productions, particularly for computer animation, which is achieved by a sequential process.

**Question 16.** The paragraph following this passage would most likely be about \_\_\_\_\_.

- A. flight training
- B. cost models
- C. computer animation
- D. applications of CAD in medicine

**Question 17.** The word "it" refers to \_\_\_\_\_.

- A. computer science
- B. fields
- C. computers
- D. computer graphics

**Question 18.** What does the passage mainly discuss?

- A. Computers as the architects of the future
- B. Routine uses of computers
- C. The rapidly growing field of computer science
- D. Computer graphics applications

**Question 19.** According to the passage, architects use CAD to \_\_\_\_\_.

- A. create three-dimensional models
- B. inspect buildings
- C. make cartographic materials
- D. create graphs

**Question 20.** The word “applications” means \_\_\_\_\_.

- A. creativity      B. layers      C. uses      D. jobs

**Question 21.** Where in the passage does the author discuss the greatest advantage of computer-aided design?

- A. Lines 6-8      B. Lines 4-6      C. Lines 12-14      D. Lines 16-18

**Question 22.** According to the passage, engineers use CAD for \_\_\_\_\_.

- A. rendering machine parts      B. making cost models  
C. advertising      D. a simulated “walk” through model rooms

**Exercise 5:** Mark the letter A, B, C or D on your answer to indicate the word that differs from the rest in the position of the main stress in each of the following questions.

**Question 23.** A. opponent      B. commitment      C. government      D. involvement

**Question 24.** A. politics      B. infamous      C. relevant      D. disaster

**Question 25.** A. phenomenon      B. emergency      C. concentration      D. humanity

**Exercise 6:** Mark the letter A, B, C or D on your answer sheet to indicate the word or phrase that is CLOSEST in meaning to the underlined part in each of the following questions.

**Question 26.** The board of directors rejected the proposed project, explaining that it was too expensive to be feasible at the present moment.

- A. practicable      B. troublesome      C. capable      D. costly

**Question 27.** The performance of the synchronized swimmers was so brilliant; the judges could find no flaws in it.

- A. find nothing imperfect      B. award no bonus  
C. find many mistakes      D. find nothing perfect

**Exercise 7:** Mark the letter A, B, C, or D on your answer sheet to indicate the sentence that is closest in meaning to each of the following questions.

**Question 28.** *They believe a single gunman carried out the attack.*

- A. The attack is believed to have carried out a single gunman.  
B. A single gunman is believed to have carried out the attack.  
C. It is believed to be carried out the attack by a single gunman.

Most parents would like to see their children succeeding academically, as they believe a good education gives them an added advantage in life. They want to see their children settled in a rewarding job and be financially well off. But is that what their children have planned for themselves? Apparently not. Most students either can't think that far ahead or have no (32)\_\_\_ of doing so. They would rather aim low so as not to be disappointed if they get low marks.

However, child psychologists, who have been consulted on the matter, stress that students should aim high, but at the same time have a(n) (33)\_\_\_ of other options. As a result, students will not have to worry about grades and in the long (34)\_\_\_ will have better chances of succeeding.

On the whole, there are many practical things that parents can do and which may prove invaluable to their children. (35)\_\_\_ being people their children can turn to, parents can plan a reasonable schedule that both they and their children agree on. According to psychologists' instructions, this schedule should include no more than eight hours of studying, three proper meals a day and some exercise. Finally, prior to each exam, parents need to (36)\_\_\_ their children that everything will be fine whatever the result.

**Exercise 10: Read the following passage on commuting, and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the questions.**

In the folklore of the Navajo people, it was said that frogs and toads fell from the sky when it rained. The phenomenon that gave rise to this belief involved the spadefoot toad, which remains dormant beneath the Sonoran Desert of Arizona, avoiding the heat and drought for as long as eight or nine months. With the onset of summer thunderstorms, however, the toads respond to the vibrations of drumming raindrops and emerge, as if fallen from the sky with the rain, to begin their brief and frantic mating season.

The male spadefoot sits in a muddy pool and fills the night with his calls, attempting to attract a female of the same species. Once a female joins him, she may lay as many as 1,000 eggs in the small pool of life-sustaining rainwater. From that point it's a race against the elements for the young, who must hatch and mature with remarkable speed before the pool evaporates beneath the searing desert sun. As the pool grows smaller and smaller, it becomes thick with tadpoles fighting for survival in the mud, threatened not only by the loss of their watery nest but also by devouring insects and animals. In as few as nine days after fertilization of the eggs, those lucky enough to survive develop through each tadpole stage and finally emerge as fully formed toads. After gorging themselves on insects, the young toads, like their parents, burrow underground, where they will lie dormant awaiting the next summer's storms.
